

Inhaled Particles

INTERFACE SCIENCE AND TECHNOLOGY
Series Editor: ARTHUR HUBBARD

In this series:

Vol. 1: Clay Surfaces: Fundamentals and Applications
Edited by F. Wypych and K.G. Satyanarayana

Vol. 2: Electrokinetics in Microfluidics
By Dongqing Li

Vol. 3: Radiotracer Studies of Interfaces
Edited by G. Horányi

Vol. 4: Emulsions: Structure Stability and Interactions
Edited by D.N. Petsev

Vol. 5: Inhaled Particles
By Chiu-sen Wang

INTERFACE SCIENCE AND TECHNOLOGY – VOLUME 5

Inhaled Particles

Photocopying

Single photocopies of single chapters may be made for personal use as allowed by national copyright laws. Permission of the Publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier's Rights Department in Oxford, UK: phone (+44) 1865 843830, fax (+44) 1865 853333, e-mail: permissions@elsevier.com. Requests may also be completed on-line via the Elsevier homepage (<http://www.elsevier.com/locate/permissions>).

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; phone: (+1) (978) 7508400, fax: (+1) (978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (+44) 20 7631 5555; fax: (+44) 20 7631 5500. Other countries may have a local reprographic rights agency for payments.

Derivative Works

Tables of contents may be reproduced for internal circulation, but permission of the Publisher is required for external resale or distribution of such material. Permission of the Publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage

Permission of the Publisher is required to store or use electronically any material contained in this work, including any chapter or part of a chapter.

Except as outlined above, no part of this work may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the Publisher.

Address permissions requests to: Elsevier's Rights Department, at the fax and e-mail addresses noted above.

Notice

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

CONTENTS

Preface	xiii
Glossary and Acronyms	xv
List of Principal Symbols	xxi
Chapter 1 Introduction	1
Problems	5
References	5
Chapter 2 Morphometry of the Human Respiratory System	7
2.1 The Head Airways Region	8
2.2 The Tracheobronchial Region	11
2.3 Anatomical Models of Lungs	15
2.4 Anatomical Models of Airway Bifurcations	24
2.5 The Alveolar Region	25
2.6 Variations in Airway Dimensions	26
2.7 Changes in Airway Dimensions during Respiration	27
Problems	28
References	28
Chapter 3 Airflow in the Respiratory System	31
3.1 Breathing Dynamics and Respiratory Volumes	31
3.2 Respiratory Physiology	33
3.3 Macroscopic Aspects of Airflow in Lung Airways	34
3.4 Local Aerodynamic Characteristics	36
3.4.1 General Concepts in Fluid Mechanics	36
3.4.2 Overview of Flow Patterns in Respiratory Airways	39
3.5 Flow in Head Airways	41
3.6 Flow in Tracheobronchial Airways	42

3.6.1 Effects of Successive Bifurcations	44
3.6.2 Effects of the Shape of Transition Zone	45
3.6.3 Effects of the Shape of Carinal Ridge	46
3.6.4 Effects of Surface Structure	46
3.6.5 Effects of Oscillatory Flow	47
3.7 Flow in the Alveolar Region	48
3.8 Summary of Flow Patterns in Airways	50
Problems	51
References	52
Chapter 4 Behavior of Aerosol Particles	55
4.1 Drag Force	57
4.2 Gravitational Settling	58
4.3 Interception	61
4.4 Inertial Impaction	61
4.5 Brownian Motion and Diffusion	66
4.6 Convective Brownian Diffusion	68
4.7 Deposition from Turbulent Flow	70
4.8 Electrostatic Forces	71
4.9 Growth of Hygroscopic Particles	73
4.10 Simultaneous Deposition by Several Mechanisms	75
Problems	76
References	77
Chapter 5 Dispersion of Inhaled Aerosol	79
5.1 General Concepts in Aerosol Dispersion	79
5.2 Aerosol Dispersion in Lung Airways	82
5.3 Gas Mixing in Lung Airways	84
Problems	85
References	85
Chapter 6 Inhalability of Ambient Particles	87
6.1 Mouth Inhalability	88

6.2 Nose Inhalability	91
Problems	91
References	91
Chapter 7 Deposition of Particles in the Respiratory System	93
7.1 General Concepts in Respiratory Deposition	93
7.2 Total and Regional Deposition	94
7.2.1 Relative Contributions of Various Mechanisms	95
7.2.2 Alveolar Deposition during Breath-Holding	97
7.3 Local Deposition	99
7.3.1 Deposition in Single Bifurcations	99
7.3.2 Effects of Successive Bifurcations	103
7.3.3 Deposition from Cyclic Flow	104
7.3.4 Deposition of Fibers in Single Bifurcations	104
Problems	105
References	106
Chapter 8 Experimental Studies on Total and Regional Deposition	108
8.1 Experimental Methods	108
8.1.1 Experimental Methods for Extrathoracic Deposition	109
8.1.2 Experimental Methods for Thoracic Deposition	110
8.1.3 Experimental Methods for Total Deposition	112
8.2 Deposition in Head Airways	112
8.2.1 Data from Human Subjects	112
8.2.2 Data from Casts	113
8.3 Deposition in the Tracheobronchial Region	115
8.4 Deposition in the Alveolar Region	118
8.5 Summary of Regional Deposition	119
8.6 Total Deposition	120
8.6.1 Deposition of Nonhygroscopic Particles	120
8.6.2 Deposition of Hygroscopic Particles	122
8.6.3 Deposition of Highly Charged Particles	122

Problems	123
References	124
Chapter 9 Deposition Models	127
9.1 Continuous Models	127
9.2 Compartments-in-Series Models	130
9.2.1 Typical Path Deposition Models	133
9.2.2 Single Path with Statistically Distributed Airway Dimensions	133
9.2.3 Tubes-and-Bifurcations-in-Series	134
9.3 The ICRP Deposition Model	135
9.3.1 Respiratory Tract Morphometry	135
9.3.2 Inhalability	136
9.3.3 Deposition in Extrathoracic Regions	136
9.3.4 Deposition in Thoracic Regions	137
9.3.5 Deposition of Hygroscopic Particles	139
9.3.6 Empirical Equations for Regional Deposition	139
9.4 The NCRP Deposition Model	140
9.4.1 Deposition in the Extrathoracic Region	141
9.4.2 Deposition in Thoracic Regions	142
9.5 Comparison of the ICRP and NCRP Models	144
9.6 Concluding Remarks	145
Problems	145
References	146
Chapter 10 Fate of Deposited Particles	149
10.1 Mechanisms of Particle Clearance	149
10.1.1 Mucociliary Transport	149
10.1.2 Phagocytosis	150
10.1.3 Entry into Lymphatic System	150
10.1.4 Absorption into Blood Circulation	150
10.2 Particle Clearance in Various Airway Regions	151

10.2.1 Extrathoracic Regions	152
10.2.2 Tracheobronchial Region	152
10.2.3 Alveolar Region	154
10.3 Particle Accumulation in Respiratory Airways	156
Problems	157
References	157
Chapter 11 Health Effects	159
11.1 Adverse Health Effects	159
11.1.1 Chemical Toxicants	159
11.1.2 Ambient Particles	161
11.1.3 Bacteria and Viruses	163
11.1.4 Radioactive Particles	164
11.2 Therapeutic Agents	165
Problems	165
References	166
Chapter 12 Applications	167
12.1 Health Risk Assessment	167
12.2 Aerosol Diagnosis	168
12.2.1 Aerosol Bolus Dispersion Test	169
12.2.2 Aerosol-Derived Airway Morphometry	170
12.3 Aerosol Therapy	171
12.3.1 Drug Formulations	172
12.3.2 Delivery Devices	172
12.3.3 Breathing Maneuvers for Targeting	173
Problems	175
References	176
Appendices	178
A1. Frequently Used Physical Constants	178
A2. Conversion Factors	178
A3. SI Prefixes	179
