CONTENTS

CONTRIBUTORS	XIII
PREFACE	XVII

1

NORMAL AND ABNORMAL MEMORY: AGING AND ALZHEIMER'S DISEASE

MARILYN S. ALBERT

Age-Related Changes in Memory	1
Age-Related Changes in Brain Structure and Function	4
Memory Changes in Early Alzheimer's Disease	7
Changes in Brain Structure in Early Alzheimer's Disease	10
Conclusion	13
References	13

2

STRESS, GLUCOCORTICIDS, AND HIPPOCAMPAL AGING IN RAT AND HUMAN

SONIA J. LUPHEN AND MICHAEL J. MEANEY

HPA Axis	20
Glucocorticoids and Aging	21
Consequences of Elevated Glucocorticoid Levels	23

Glucocorticoids and Hippocampal Electrophysiology	23
Glucocorticoids and Synaptic Plasticity Levels	25
Consequences of Elevated Glucocorticoid Levels: Neuronal Survival	26
Individual Differences in HPA Activity and Brain Aging	27
Glucocorticoids and Human Aging	30
Glucocorticoids and Age-Related Neuropathology in Humans	31
Glucocorticoids and Human Cognition	32
HPA Function and Hippocampal Aging in Humans	35
Subgroups of Elderly Subjects with Regard to Patterns of Cortisol Secretion over Years	35
Cognitive Deficits Related to Hippocampal Damage in Relation to Subgroups	40
References	43

3

SPATIAL COGNITION AND FUNCTIONAL ALTERATIONS OF AGED RAT HIPPOCAMPUS

C. A. BARNES

Technical Advances in Single Cell Recording Studies	52
Do Old Rats Have Broader, Less Reliable Place Fields?	52
Effects of Cue and Task Demand Manipulations on Place Cell Firing Properties of Young and Old Rats	54
Differences between Studies That Remain Unexplained	56
Spatial Selectivity: Interaction with Experience during a Recording Session	57
Multistability of Place Cell Maps in Old Rats	59
Summary and Conclusions	62
References	63

4

IDENTIFICATION OF MOLECULAR AND CELLULAR MECHANISMS OF LEARNING AND MEMORY: THE IMPACT OF GENE TARGETING

ALCINO J. SILVA, KARL PETER GIESE, AND PAUL W. FRANKLAND

LTP as a Cellular Mechanism for L&M	68
Short-Term Plasticity and Learning	71
Spiking and Learning	73

Future of Genetic Techniques	76
Conclusions	78
References	79

5

NORMAL AGING AND ALZHEIMER'S DISEASE

BRADLEY T. HYMAN AND TERESA GÓMEZ-ISLA

Text	83
References	89

6

TRANSGENIC MOUSE MODELS WITH NEUROFILAMENT-INDUCED PATHOLOGIES

JEAN-PIERRE JULIEN

Neurofilament Structure and Function	93
Perturbations of Neurofilament Metabolism in Neurodegenerative Diseases and in Aging	94
Mouse Models with Neurofilament Pathologies	95
Interference of Axonal Transport by Disorganized Neurofilaments	98
NF-H Mutations in Amyotrophic Lateral Sclerosis	100
A Link between Neurofilaments and Oxidative Stress?	100
Future Directions	101
References	102

7

TRANSGENIC MODELS OF AMYOTROPHIC LATERAL SCLEROSIS AND ALZHEIMER'S DISEASE

PHILIP C. WONG, DAVID R. BORCHELT, MICHAEL K. LEE,
GOPAL THINAKARAN, SANGRAM S. SISODIA, AND DONALD L. PRICE

Transgenic Approaches	108
Amyotrophic Lateral Sclerosis and Transgenic Mice with SOD1 Mutations	108
Alzheimer's Disease and Transgenic Mice with APP or PS1 Mutations	111
Conclusions	115
References	116

8

TOWARD A GENETIC ANALYSIS OF UNUSUALLY SUCCESSFUL NEURAL AGING

GEORGE M. MARTIN

- A Brief Primer of Evolutionary Biological Aspects of Relevant Gene
Action 126
- Some Implications of the Evolutionary Biological Theory of Aging for Human
Neurobiology 128
- Nature–Nurture Interactions 130
- Approaches to the Genetic Analysis of Unusually Well-Preserved Cognitive
Function 131
- Which Phenotypes Deserve Our Initial Attention? 131
- Conclusions 133
- Further Readings 133
- References 134

9

THE ROLE OF THE PRESENILINS IN ALZHEIMER'S DISEASE

RUDOLPH E. TANZI

- Presenilin Metabolism and Function 136
- Presenilin Mutations and APP Metabolism 136
- A Role for the Presenilins in Apoptosis 137
- Summary 138
- References 139

10

MECHANISMS OF NEURON DEATH IN NEURODEGENERATIVE DISEASES OF THE ELDERLY: ROLE OF THE LEWY BODY

JOHN Q. TROJANOWSKI, JAMES E. GALVIN, M. LUISE SCHMIDT,
PANG-HSIEN TU, TAKESHI IWATSUBO, AND VIRGINIA M.-Y. LEE

- Morphological and Immunohistochemical Studies of LBs 144
- Generation and Characterization of MAbs to Purified LBs 145

Insight into the Pathobiology of LBs from Transgenic Mice	146
Summary	147
References	148

11

MICROTUBULE-ASSOCIATED PROTEIN TAU: BIOCHEMICAL MODIFICATIONS, DEGRADATION, AND ALZHEIMER'S DISEASE

SHU-HUI YEN, PARIMALA NACHARAJU, LI-WEN KO,
AGNES KENESSEY, AND WAN-KYNG LIU

Phosphorylation	155
Degradation of Tau	157
Glycation	163
Summary	165
References	165

12

A NOVEL GENE IN THE ARMADILLO FAMILY INTERACTS WITH PRESENILIN 1

KENNETH S. KOSIK, CAROLE HO, UDAYA LIYANGE, CYNTHIA LEMERE,
MIGUEL MEDINA, AND JIANHUA ZHOU

Discovery of δ -Catenin	175
References	177

13

PUTATIVE LINKS BETWEEN SOME OF THE KEY PATHOLOGICAL FEATURES OF THE ALZHEIMER'S BRAIN

RÉMI QUIRION, DANIEL AULD, UWE BEFFERT, JUDES POIRIER,
AND SATYABRATA KAR

Cholinergic Deficits and A β Peptides	182
Cholinergic Deficits and the ApoE ₄ Gene	190

Possible Links between the ApoE ₄ Genotype and β -Amyloid Peptides	194
Concluding Remarks	196
References	196

14

UNRAVELING THE CONTROVERSY OF HUMAN PRION PROTEIN DISEASES

ANDRÉA LEBLANC

Three Manners to Contract Prion Protein Diseases: Inheritance, Iatrogenic Transmission, and Sporadic Manifestation	202
Clinical Features of Human Prion Protein Diseases	202
Pathological Features of Human Prion Protein Diseases	203
Molecular Biology of Prion Protein Disease	204
Biochemical Hallmarks of Human Prion Protein in Normal and Affected Brains	206
Molecular Signature of Prion Protein Diseases	207
Functions of the Normal Prion Protein	208
Transmissibility Models for Prion Protein Diseases	210
Conclusions	214
References	214

15

TRANSLATIONAL CONTROL, APOPTOSIS, AND THE AGING BRAIN

EUGENIA WANG

Cloning, Sequencing, and Analyzing Full-Length Human, Rat, and Mouse EF-1 α and S1 cDNA Clones and Rat S1 Genomic Clones	223
Characterization of Tissue Specificity and Age-Dependent Changes of S1 Expression	224
S1 is Found in Neurons Only, Not in Astrocytes or Microglia	225
EF-1 α /S1 Supergene Family	225
Multiple Functional Involvement of EF-1 α	226
General Principles for Translation Regulation	226
Apoptosis, Cell Cycle Traverse, and Cytoskeletal Organization	227
Apoptosis, Cell Cycle Traverse, Protein Translation, and Signal Transduction	228

Reentry to Cell Cycle Traverse, Apoptosis Susceptibility, and Resistance	228
Control of Long-Lived Phenotypes and Neuronal Survival	229
Signal Transduction and Chaos Theory	230
Signal Transduction and Neuronal Network Function	232
Signal Transduction, Apoptosis, and Functional Impairment in Neurons	233
Signal Transduction and Translational Control	234
Translational Control and Neuronal Repair	236
Neuronal Functionality, Translational Control, and the Aging Brain's Revisiting of Embryonic Gene Expression	237
Summary	237
References	238

16

ASTROCYTE SENESCENCE AND THE PATHOGENESIS OF PARKINSON'S DISEASE

HYMAN M. SCHIPPER

Parkinson's Disease	243
Oxidative Stress Hypothesis of Parkinson's Disease	245
Iron Deposition in Parkinson's Disease	247
Astrocytes in Health and Disease	248
Peroxidase-Positive Subcortical Glial System	249
Peroxidase-Positive Astrocytes in Primary Culture	250
Subcellular Precursors of Peroxidase-Positive Astroglial Inclusions	251
Astrocyte Granule Biogenesis and the Cellular Stress Response	251
Iron Sequestration in Aging Astroglia	252
Role of HO-1 in Brain Iron Deposition	253
Protoxin Bioactivation by Aging Astroglia	254
Pathological Neuronal-Glial Interaction in Parkinson's Disease	255
Further Readings	257

CONTRIBUTORS

Numbers in parentheses indicate the pages on which the authors' contributions begin.

Marilyn S. Albert (1) Massachusetts General Hospital, Charlestown, Massachusetts 02129

Daniel Auld (181) Douglas Hospital Research Centre, McGill Center for Studies on Aging and Department of Psychiatry, McGill University, Montréal, Québec, Canada H4H 1R3

C. A. Barnes (51) Departments of Psychology and Neurology and Arizona Research Laboratories Division of Neural Systems, Memory and Aging, University of Arizona, Tucson, Arizona 85724

Uwe Beffert (181) Douglas Hospital Research Centre, McGill Center for Studies on Aging and Department of Psychiatry, McGill University, Montréal, Québec, Canada H4H 1R3

David R. Borchelt (107) Department of Pathology and the Division of Neuropathology, The Johns Hopkins University School of Medicine, Baltimore, Maryland 21205

Paul W. Frankland (67) Cold Spring Harbor Laboratory, Cold Spring Harbor, New York 11724

James E. Galvin (143) Center for Neurodegenerative Disease Research, Department of Pathology and Laboratory Medicine, University of Pennsylvania School of Medicine, and Department of Neurology, Allegheny University of the Health Sciences, Philadelphia, Pennsylvania 19104

Karl Peter Giese (67) Cold Spring Harbor Laboratory, Cold Spring Harbor, New York 11724

Teresa Gómez-Isla (83) Neurology Department, Massachusetts General Hospital, Boston, Massachusetts 02114

Carole Ho (171) Center for Neurologic Diseases, Brigham and Women's Hospital and Harvard Medical School, Boston, Massachusetts 02115

- Bradley T. Hyman** (83) Neurology Department, Massachusetts General Hospital, Boston, Massachusetts 02114
- Takeshi Iwatsubo** (143) Department of Neuropathology and Neuroscience, University of Tokyo, 113-0052 Tokyo, Japan
- Jean-Pierre Julien** (93) Centre for Research in Neuroscience, McGill University, The Montréal General Hospital Research Institute, Montréal, Québec, Canada H3G 1A4
- Satyabrata Kar** (181) Douglas Hospital Research Centre, McGill Center for Studies on Aging and Department of Psychiatry, McGill University, Montréal, Québec, Canada H4H 1R3
- Agnes Kenessey** (153) Department of Pathology, Albert Einstein College of Medicine, Bronx, New York 10461
- Li-wen Ko** (153) Department of Pathology, Albert Einstein College of Medicine, Bronx, New York 10461
- Kenneth S. Kosik** (171) Center for Neurologic Diseases, Brigham and Women's Hospital and Harvard Medical School, Boston, Massachusetts 02115
- Andréa LeBlanc** (201) The Bloomfield Center for Research in Aging, Lady Davis Institute for Medical Research, Sir Mortimer B. Davis Jewish General Hospital, and Department of Neurology and Neurosurgery, McGill University, Montréal, Québec, Canada H3T 1E2
- Michael K. Lee** (107) Department of Pathology and the Division of Neuropathology, The Johns Hopkins University School of Medicine, Baltimore, Maryland 21205
- Virginia M.-Y. Lee** (143) Center for Neurodegenerative Disease Research, Department of Pathology and Laboratory Medicine, University of Pennsylvania School of Medicine, Philadelphia, Pennsylvania 19104
- Cynthia Lemere** (171) Center for Neurologic Diseases, Brigham and Women's Hospital and Harvard Medical School, Boston, Massachusetts 02115
- Wan-Kyng Liu** (153) Department of Pathology, Albert Einstein College of Medicine, Bronx, New York 10461
- Udaya Liyange** (171) Center for Neurologic Diseases, Brigham and Women's Hospital and Harvard Medical School, Boston, Massachusetts 02115
- Sonia J. Lupien** (19) Aging Research Center, Douglas Hospital Research Center, McGill University, Montréal, Québec, Canada H4H 1R3
- George M. Martin** (125) Departments of Pathology and Genetics and the Alzheimer's Disease Research Center, University of Washington, Seattle, Washington 98195
- Michael J. Meaney** (19) Aging Research Center, Douglas Hospital Research Center, McGill University, Montréal, Québec, Canada H3W 1W5
