Advances in **IMMUNOLOGY**

VOLUME **96**

Edited by

FREDERICK W. ALT

Howard Hughes Medical Institute, Boston, Massachusetts

Associate Editors

K. FRANK AUSTEN

Harvard Medical School, Boston, Massachusetts

TASUKU HONJO

Kyoto University, Kyoto, Japan

FRITZ MELCHERS

University of Basel, Basel, Switzerland

JONATHAN W. UHR

University of Texas, Dallas, Texas

EMIL R. UNANUE

Washington University, St. Louis, Missouri

CONTENTS

Contributors

ix

1. New Insights into Adaptive Immunity in Chronic Neuroinflammation	1
Volker Siffrin, Alexander U. Brandt, Josephine Herz, and Frauke Zipp	
1. Introduction: Multiple Sclerosis Is a Heterogeneous Inflammatory Disease of the Nervous System	2
2. Experimental Autoimmune Encephalomyelitis as a Model for MS	3
3. Current Knowledge About Induction and Perseveration of Chronic Neuroinflammation	5
4. Therapeutic Approaches to Chronic Neuroinflammation	20
Acknowledgments	29
References	29
 2. Regulation of Interferon-γ During Innate and Adaptive Immune Responses	 41
Jamie R. Schoenborn and Christopher B. Wilson	
1. Introduction	43
2. IFN- γ -Producing Cells	45
3. Signaling Pathways Controlling IFN- γ Production by NK Cells	48
4. Control of IFN- γ Production by NKT Cells	52
5. Signaling Pathways in the Differentiation of CD4 and CD8 T Cells	53
6. Transcription Factors Downstream of the TCR, Activating NK Receptors, and Cytokine Receptors	60
7. Epigenetic Processes Govern Plasticity of Cell Fate Choices and Help to Identify Distal Regulatory Elements	72
8. Transcriptional Regulatory Elements Within the <i>Ifng</i> Gene	74
9. Functional Analysis of Candidate Distal Regulatory Elements in the <i>Ifng</i> Locus	82
10. Conclusions and Future Directions	84
Acknowledgments	85
References	85

3. The Expansion and Maintenance of Antigen-Selected CD8⁺ T Cell Clones **103**

Douglas T. Fearon

1. Background 105
2. The Behavior of the CD8⁺ T Cell in Persistent Viral Infections 111
3. Clarifying the Role of IL-2 in the Clonal Expansion and Effector Differentiation of the CD8⁺ T Cell 115
4. Coreceptors Mediating IL-2-Independent CD8⁺ T Cell Clonal Expansion 118
5. Modifying the Antiproliferative Effects of Types I and II IFN 120
6. Transcriptional Control of Replicative Senescence: Bmi-1, Blimp-1, and BCL6/BCL6b 123
7. A Refined Model for CD8⁺ T Cell Clonal Expansion: Sequential Phases of CD27-Dependent Self-Renewal and IL-2-Dependent Differentiation 126
8. Clinical Extensions of the TCR/CD27 Pathway: Adoptive CD8⁺ T Cell Therapy 127
- Acknowledgments 129
- References 129

4. Inherited Complement Regulatory Protein Deficiency Predisposes to Human Disease in Acute Injury and Chronic Inflammatory States **141**

Anna Richards, David Kavanagh, and John P. Atkinson

1. Altered Self Triggers Innate Immunity 143
2. Regulation of the Alternative Complement Pathway 145
3. Lessons from Homozygous Complement Regulatory Protein Deficiencies 153
4. Complement and Atypical Hemolytic Uremic Syndrome 154
5. Complement and Age-Related Macular Degeneration 160
6. Immunopathogenesis of aHUS and AMD 163
7. Treatment of aHUS and AMD 167
8. Conclusions: Lessons and Implications 168
- References 169

5. Fc-Receptors as Regulators of Immunity **179**

Falk Nimmerjahn and Jeffrey V. Ravetch

1. Introduction 180
2. The Family of Activating and Inhibitory FcRs 181
3. Activating and Inhibitory FcR Signaling Pathways 183
4. The Role of Activating and Inhibitory FcRs on Innate Immune Effector Cells 185

5. Modulation of Antibody Activity	188
6. Activating and Inhibitory FcR Expression on DCs	190
7. Fc γ RIIB as a Master Regulator of Humoral Tolerance and Plasma Cell Survival	192
8. Summary and Outlook	195
Acknowledgments	196
References	196
<i>Index</i>	205
<i>Content of Recent Volumes</i>	211
<i>See Color Plate Section in the back of this book</i>

CONTRIBUTORS

Number in parentheses indicate the pages on which the authors' contributions begin.

John P. Atkinson (141)

Washington University School of Medicine, St. Louis, Missouri

Alexander U. Brandt (1)

Cecilie-Vogt-Clinic for Molecular Neurology, Charité-Universitaetsmedizin Berlin, 10117 Berlin, Germany; *and* Max-Delbrueck-Center for Molecular Medicine, 13125 Berlin, Germany

Douglas T. Fearon (103)

Wellcome Trust Immunology Unit, University of Cambridge, Medical Research Council Centre, Cambridge CB2 2QH, United Kingdom

Josephine Herz (1)

Cecilie-Vogt-Clinic for Molecular Neurology, Charité-Universitaetsmedizin Berlin, 10117 Berlin, Germany; *and* Max-Delbrueck-Center for Molecular Medicine, 13125 Berlin, Germany

David Kavanagh (141)

Washington University School of Medicine, St. Louis, Missouri

Falk Nimmerjahn (179)

Laboratory for Experimental Immunology and Immunotherapy, Nikolaus-Fiebiger-Center for Molecular Medicine, University of Erlangen-Nuremberg, Erlangen 91054, Germany; *and* Laboratory for Molecular Genetics and Immunology, Rockefeller University, New York, New York

Jeffrey V. Ravetch (179)

Laboratory for Molecular Genetics and Immunology, Rockefeller University, New York, New York

Anna Richards (141)

Washington University School of Medicine, St. Louis, Missouri

Jamie R. Schoenborn (41)

Molecular and Cellular Biology Graduate Program, University of Washington, Seattle, Washington

Volker Siffrin (1)

Cecilie-Vogt-Clinic for Molecular Neurology, Charité-Universitaetsmedizin Berlin, 10117 Berlin, Germany; *and* Max-Delbrueck-Center for Molecular Medicine, 13125 Berlin, Germany

Christopher B. Wilson (41)

Department of Immunology, University of Washington, Seattle, Washington

Frauke Zipp (1)

Cecilie-Vogt-Clinic for Molecular Neurology, Charité-Universitaetsmedizin Berlin, 10117 Berlin, Germany; *and* Max-Delbrueck-Center for Molecular Medicine, 13125 Berlin, Germany

New Insights into Adaptive Immunity in Chronic Neuroinflammation

**Volker Siffrin, Alexander U. Brandt,
Josephine Herz, and Frauke Zipp**

Contents	
1. Introduction: Multiple Sclerosis Is a Heterogeneous Inflammatory Disease of the Nervous System	2
2. Experimental Autoimmune Encephalomyelitis as a Model for MS	3
3. Current Knowledge About Induction and Perseveration of Chronic Neuroinflammation	5
3.1. General considerations	5
3.2. CD4 ⁺ T helper cells in chronic neuroinflammation	5
3.3. CD8 ⁺ T cells in neuroinflammation: A never-ending controversy	15
3.4. B cells and antibody-mediated immune responses in chronic neuroinflammation	17
4. Therapeutic Approaches to Chronic Neuroinflammation	20
4.1. General considerations	20
4.2. Current therapeutic concepts	21
4.3. New therapeutic concepts	23
Acknowledgments	29
References	29
