Notice of Liability

The information in this book is distributed on an "As Is" basis without warranty. While every precaution has been taken in the preparation of the book, neither the author nor Peachpit shall have any liability to any person or entity with respect to any loss or damage caused or alleged to be caused directly or indirectly by the instructions contained in this book or by the computer software and hardware products described in it.

While every effort has been made to ensure accuracy at the time of writing, the products and offerings by PayPal, including pricing and the manner in which they are accessed or controlled through www.paypal.com, are subject to change without notice. Subjective statements about the quality of products described in this book are not claims by PayPal but represent the sole opinion of the author.

Trademarks

Many of the designations used by manufacturers and sellers to distinguish their products are claimed as trademarks. Where those designations appear in this book, and Peachpit was aware of a trademark claim, the designations appear as requested by the owner of the trademark. All other product names and services identified throughout this book are used in editorial fashion only and for the benefit of such companies with no intention of infringement of the trademark. No such use, or the use of any trade name, is intended to convey endorsement or other affiliation with this book. In addition, designated trademarks and brands are the property of their respective owners. Reference to any trademark or trade name is not intended to convey endorsement by or any affiliation with the owner of the trademark.

*To my amazing parents, Mary and John Savage,
who taught me the importance of feeling secure.
They've been my safety net my entire life.*

Michelle Savage is a creative, professional writer, who has written books, articles, Web content, marketing materials, and educational guides for various corporations and publications, including PayPal, eBay, Microsoft, Symantec, TrustedID, SBC, Suze Orman, and Yahoo. Born and raised in New York City, she moved to the San Francisco Bay Area during the dot-com boom in the late 1990s. Since then, she has specialized in Web writing and digital media, focusing on online security, mobile security, social networking, and privacy protection topics.

Acknowledgments

Author's Acknowledgements

I would like to express my deep gratitude to the many people who saw me through this book; to all the experts who provided support, took the time to explain complex concepts, read, wrote, offered feedback, allowed me to quote them, and assisted in the editing, proofreading and design.

I would like to thank my PayPal Press and PeachPit Press for enabling me to publish this book. Above all I want to thank my husband, Josh, and my daughters, Camryn and Taylor, for giving me the support I needed, despite the amount of time it took me away from them.

I would like to thank Matt Jones, my editor and mentor at PayPal, who made a phenomenal contribution to this book, and Eunice Louie, Cynthia Robinson, Jonah Otis, Karen Richards, Marcus Meazzo, Markus Jacobsson, Bill Leddy and Gus Maldonado for their vision and support.

Last and not least: I would like to thank PeachPit Press's incredible editorial team for their incredible editorial contributions.

PayPal Press Acknowledgements

We applaud our PayPal security subject-matter experts whose knowledge was matched only by their dedication; Production Editor Karen Richards, whose diligent teamwork mastered our ambitious schedule; and Illustrator Gokul Nair, whose astute artwork enhanced the value of this book.

We'd also like to thank the following PayPal Press executive content and design sponsors for their highly supportive and creative contributions: Janet Isadore, Jonah Otis, and Marcus Meazzo.

Foreword

Technology moves fast. So do criminals. Beleaguered online merchants might feel like the only thing more daunting than preparing for Web 4.0 is bracing for Malware 5.0. Cyber attacks hit large and small merchants alike, phishers and fraudsters seem to be everywhere, and identity theft is so prevalent that we know credit score jingles better than Top 40 hits.

But this is not the end of the world, and you can't afford to hide in the closet. Your customers are online, on their smartphones, and buying goods and services in a virtual market that's growing at an amazing rate. You've got to ride this digital wave, but also make sure you don't get wiped out by the bad guys.

Wait, you say. Isn't security what *you* do, PayPal? Why do I have to worry about this stuff? And you're half right. We have a small army of very talented people fighting cybercrime, protecting our customers' data, and shutting down scammers day and night.

But we need your help.

It's up to you to choose strong passwords, install virus software on your computers, educate employees about phishing emails, and safeguard your customers' personal information.

That's why we wrote this book: to be your partner in anticrime, to share what we know about protecting your business and customers, and to help you grow and thrive. Let's get to it.

—Russell Bauder
Risk Design Team Lead

Contents

Foreword	v
1 Why Security Is Every Web Merchant's Concern ...	2
What You Can Do Right Now	5
Types of Online Fraud	6
What a Cybercriminal Wants	7
