Blood: A Very Short Introduction

VERY SHORT INTRODUCTIONS are for anyone wanting a stimulating and accessible way into a new subject. They are written by experts, and have been translated into more than 45 different languages.

The series began in 1995, and now covers a wide variety of topics in every discipline. The VSI library now contains over 500 volumes—a Very Short Introduction to everything from Psychology and Philosophy of Science to American History and Relativity—and continues to grow in every subject area.

Titles in the series include the following:

Acknowledgements

I am grateful for the support of the many scientists who suggested improvements to the first draft of this book. These include: Mervyn Singer and David Highton (both at University College London) who particularly helped with the chapters on blood pressure, blood flow, and blood transfusion; Mike Wilson (University of Essex) who contributed many interesting stories about haemoglobin; and Nelson Fernandez (also University of Essex) who was a great support in the writing of the immunology section. I would also like to thank the three anonymous readers of the initial proposal for many pertinent suggestions. It goes without saying that any remaining scientific errors are my own fault.

My wife, Helen Cooper, provided the valuable insights of an intelligent non-scientist. At Oxford University Press, Jenny Nugee and Latha Menon provided advice on content and assisted in technical aspects of the book's production.

Finally writing a book is a time consuming and emotional commitment. I could not have succeeded without the support of my family especially my mother Maria, my wife Helen, and my two children Alex and Lauren.
