FOREWORD TO THE ELSEVIER LEXICA

The purpose of the *Elsevier Lexica* is to provide technicians and translators with dictionaries covering very specialized subjects. The level of technicity, the comprehensiveness and the reliability will remain as high as they are in the larger volumes and in the companion series of the *Glossaria Interpretum*, but the very limits of the field dealt with in each case will enable specialists to secure pocket-size books where they will find all the terms which belong more or less exclusively to their respective activities.

In each case, the languages selected are those in which substantial literature is available on the subject.

Every volume has been prepared by an expert in the field with the help of other experts from countries where the various languages covered are used.

JEAN HERBERT

FROM THE SAME PUBLISHER :
