Humans have been around for a long time, maybe as much as two million years. That sounds like a lot! But it really isn't all that long when you compare it to the dinosaurs. They ruled the earth for about 165 million years. They were around 80 times longer than humans have managed so far.

Here's a grab-bag of facts about dinosaurs: the biggest, the smallest, the meanest, and the mildest. Read on and become a dino-expert!
