## About the author

Dr Christine M. Tilley is an associate of Queensland University of Technology (QUT), Brisbane, Australia. She has lectured at QUT and other tertiary institutions for some two decades, and served as an adviser and board member for numerous library and informational technology committees. Additionally, she was the manager of the QUT Faculty of Information Technology Computer Managed Learning facility; a member of the Preservation Sub-committee, Australian Council of Libraries & Information Services (Queensland branch); a member of the State Committee, Australian Council of Libraries & Information Services (previously Australian Advisory Council of Bibliographic Services); and coordinator of the Early Imprints Project Queensland (EIPQ). She has extensive experience in disability issues, has been active in disability and other community organisations and continues to publish widely in this area. Her research work has included information and communications technology and disability, information literacy, community information use and the EIPQ. Furthermore, she has been an approved Commonwealth valuer (antiquarian and second-hand books, especially early printing, fine printing and illustrated books, Australianiana) for the Cultural Gifts Program (Insurance, Family Division and Probate), Department of the Environment, Water, Heritage and the Arts, Canberra, for the past 25 years.

## Acknowledgements

Firstly, I acknowledge and thank Professor Christine Bruce, my mentor in academic matters, for sharing her inspiration, wisdom and knowledge over the years. She is an intellectual mentor of the finest kind as well as a friend, and to her go my genuine thanks. Christine is also an excellent role model and her wise counsel and expert guidance in all phases of the planning, research, analysis and writing stages have made this work a reality.

To my other academic mentors, Professor Andrew Hills, Associate Professor Gillian Hallam, Dr Neville Meyers, Professor Donald Schauder and Professor Nicholas Bellamy, director of CONROD, I give my sincere thanks for their encouragement, and also for their practical assistance. I also wish to acknowledge all the members of the QUILT research group who met regularly and offered collegial advice and support throughout the process of the original study – particularly Associate Professor Sylvia Edwards, Michael Middleton and Hilary Hughes.

My friend and ex-colleague Dr Gerard Finn was a source of practical help and inspiration, as were Louise Campbell, Kylie Downs, Gunela Astbrink, my cousin Jan Kiek, Anne Maguire and Drs Faye Thompson, Mary Ditton and Glenice Watson, whose assistance, example and encouragement were essential. In addition to the above persons, my thanks go to other colleagues and friends in the academic, library and support staff of the Queensland University of Technology, Brisbane, Australia, who gave freely their advice as well as their assistance. I also would like to mention Wendy Dent and Judith Anderson, Ray Duplock, High Performance Computing and Research Support Group, Information Technology Services and Laura Venn, assistant to the assistant dean, Teaching and Learning, Faculty of Information Technology. Besides the assistance from the above, many individuals gave advice, help and encouragement in the progress of the work and the
