About the Author

Michael Guthrie is the lead developer at Nagios enterprises and has developed new features and add-ons for Nagios Core, Nagios XI, and Nagios Fusion. Michael started his IT career at Nagios Enterprises as a student developer writing documentation and new components for Nagios Core and Nagios XI, as well as giving technical support. At work, Michael particularly enjoys working on UI development, performance tuning, and data visualizations. When he's not at work he enjoys spending time with his family, being outside, and working on his house.

Michael started his jobs at Nagios Enterprises by writing a substantial amount of documentation for Nagios XI, which is now the Nagios XI Administrator's Manual.

> First, I would like to thank Ethan Galstad for creating Nagios, and giving me the opportunity at Nagios Enterprises to work with this great project. I would like to thank Mike Weber from Spidertools, for the outstanding Nagios training I received when I first started working there. I'd like to thank all of the community developers who contribute to Nagios and its surrounding projects. I'd also like to thank my fellow techs here, at Nagios Enterprises for helping to proofread my work and test out my instructions. I'm thankful to my family for giving me the reason to bring my best to work every day, and to the Lord for leading me to the most rewarding job I've ever had.
