CONTENTS

Preface	v
1 Introduction and scope	1
1.1 Objectives	1
1.2 Scope	2
1.3 Further information	3
2 Definitions and glossary	4
2.1 Definitions	4
2.2 Glossary	5
3 Components of examination	9
4 Personnel, qualifications, and quality assurance	10
4.1 Personnel	10
4.2 Qualifications	10
4.3 Quality assurance	11
5 Procedures	13
5.1 Principles	13
5.2 Content	13
5.3 Additional requirements	14
6 Pre-inspection activities	15
6.1 Briefing	15
6.2 Location reference marking	15
6.3 Cleaning	15
7 Inspection for flaws	17
7.1 Magnetic particle inspection	17
7.2 Alternating current potential drop	20
7.3 Eddy current and alternating current field measurement	21
7.4 Flooded member detection	22
7.5 Radiographic methods	23
7.6 Ultrasonic inspection methods	23
7.7 Visual inspection	28

8	Inspection for corrosion	30
8.1	Cathodic protection potential measurements	30
8.2	Wall thickness measurement	32
9	Passive NDT methods	33
10	Post-inspection activities	34
10.1	Recording and retention of data	34
10.2	Inspection after repair	34
11	Introduction of new equipment	36
12	Remote operated vehicle deployment	38
12.1	Introduction	38
12.2	Present status	38
12.3	Conclusions	40
Appendix A – Further information		41
Appendix B – Summary of underwater NDT qualification schemes		66
Bibliography – Selected reference documents on NDT of offshore construction		68
1–Government bodies		68
2–Certifying authorities and classification societies		70
3–Advisory bodies and others		73
4–Associated documents		75
