

TOTALITY!

An Eclipse Guide in Rhyme and Science

Jeffrey Bennett

Tens of millions of people came out to view the 2017 total solar eclipse, the first in the USA in nearly four decades. Now we are approaching an even more exciting, back-to-back pair of USA eclipses: an annular eclipse on October 14, 2023 and a total solar eclipse on April 8, 2024. You won't want to miss them, and there's no better way to prepare than with this book and the free app, *Totality by Big Kid Science*.

The book features a unique combination of rhyme and science that makes it suitable for readers of all ages. The engaging rhyme, with a couplet on each page, has been constructed to serve as a mnemonic device for the underlying science, which is further explained through beautiful illustrations and "Big Kid Box" sidebars. The book concludes with a glossary, suggested activities, and an eclipse science summary, features that will add particular value for parents and teachers learning along with their kids or students.
