## **Vorwort zur fünften Auflage**

Die vorangegangenen Auflagen des Wörterbuchs „Chemie und chemische Technik“, Deutsch-Englisch, haben bei Nutzern im In- und Ausland eine gute Aufnahme gefunden. Da die 4. Auflage nun vergriffen ist, entschlossen sich Verlag, Herausgeber und Autoren im Zusammenhang mit der Bearbeitung des gleichnamigen Wörterbuchs Englisch-Deutsch zur Herausgabe einer 5., bearbeiteten und erweiterten Auflage.

Dabei wurden etwa 2000 Neueinträge, vorwiegend aus den Gebieten organische Chemie, Biochemie und physikalische Chemie, eingearbeitet sowie zahlreiche Einträge präzisiert und ergänzt. Neben anderen wurden dafür zahlreiche von der IUPAC (International Union of Pure and Applied Chemistry) herausgegebene Publikationen ausgewertet. Der Herausgeber und die Autoren waren auch bei der vorliegenden Bearbeitung bemüht, den Erwartungen der Nutzer hinsichtlich Genauigkeit und Zuverlässigkeit der Wörterbucheinträge zu entsprechen.

Dem Langenscheidt Fachverlag danken wir für die gute Zusammenarbeit bei der Fertigstellung des Manuskripts. Besonderer Dank gilt der Lektorin Frau Helga Kautz für die fachkundige Begleitung der Arbeiten.

Helfende Kritik und Vorschläge zur Verbesserung des Wörterbuchs nehmen die Autoren gern entgegen und bitten, diese an den Langenscheidt Fachverlag, Crellestraße 28–30, D-10827 Berlin, zu richten.

## **Preface to the Fifth Edition**

The previous editions of our German-English dictionary *Chemistry and Chemical Technology* have found a very loyal usership in both Germany and abroad. As the fourth edition is now out of print, the publisher, editor and authors decided to produce a revised and expanded 5th edition to accompany the revision of the English-German dictionary of the same name.

Approximately 2000 new entries have been added – primarily from the fields of organic chemistry, biochemistry and physical chemistry – while a great number of existing entries have been expanded upon and made more precise. Many of the publications used by the authors for lexical research came from the International Union of Pure and Applied Chemistry (IUPAC). In carrying out this revision, the publisher and authors once again strove to provide the accuracy and reliability which users of this dictionary have come to expect.

We would like to thank the Langenscheidt Fachverlag for their excellent collaboration in the preparation of the manuscript. Special thanks goes to the reader, Ms. Helga Kautz, for her expert guidance during the course of our work.

The authors welcome any constructive criticism and suggestions aimed at improving this dictionary. Users should send their comments to Langenscheidt Fachverlag, Crellestraße 28–30, D-10827 Berlin.

*J. Knepper*
