

Albert Bright

AstronEfficiencyOnomy

Astronomy rules for more efficiency at GlobalOnomy: economy & currency, knowledge & wisdom, peace & liberty, health & wealth as well as welfare & sustainability. For world-wide-wealth!

Albert Bright

AstronEfficiencyOnomy Solutions

**The formulas of astronomy as a solution
for greater efficiency**

Volume 3 of GlobalOnomy

© 2019 Albert Bright

1st German edition: 2019

© 2021 Albert Bright

1st British edition – as 3/3 trilogy of GlobalOnomy, 2021

AstronEfficiencyOnomy

ISBN 9783753415956

Publisher: www.world-wide-wealth.com

Author: Albert Bright

Envelope design, illustration: Albert Bright,

Editor, proofreading: www.world-wide-wealth.com,

Translation: www.world-wide-wealth.com

Publisher & Print: BoD, [Books on Demand](#) GmbH, Norderstedt
/ Hamburg, Germany

The German National Library records this publication in the German National Bibliography; detailed bibliographic data can be found on the Internet via <http://dnb.dnb.de> .

This book arose from the fascination of the universe with its seemingly limitless dimensions and growth - and the idea of using its laws of nature as a recipe for a better world.

Albert Bright

Astronomy-rules for a better GlobalOnomy:
economy & currency, knowledge & wisdom,
peace & liberty, health & wealth as well as
welfare & sustainability - world-wide!

.

Outline

A. INTRODUCTION	1
B. GENERAL	13
C. BOOSTER	15
D. SPACE	24
D.1. Extrapolation of SPACE	26
D.2. SPACE as energy	28
D.3. SPACE as a force	30
D.4. SPACE as vacuum	35
D.5. SPACE as optical illusion	43
D.6. Unmasking "dark energy"	48
D.7. The universe "reduction"	52
D.8. SPACE, indefiniteness of space?	56
D.9. SPACE, the end of the universe?	57
D.10. Space as inner- & outer connected spiral – our book-picture.	58
D.11. Universe-space-energy-suck Mission statement for demand-suck?	59

E. TIME	65
E.1. Extrapolation of TIME	66
F. Correlations of SPACE and TIME	73
F.1. General	73
F.2. Formula engineering	75
F.3. Relativity of SPACE and TIME	79
F.3.1. The relativity of SPACE	79
F.3.2. The reality of SPACE	82
F.3.3. The relativity of TIME	89
F.3.4. Double relativity	90
F.3.5. Visible versus invisible	91
F.3.6. The SPACE-TIME correlation	92
F.3.6.1. Evidence	94
G. "SPEED"	96
G.1. The "speed paradox"	97
G.1.1 Invisible "speed"	97
G.1.2 Visible non-speed-increase	99
G.1.3 Secret speed "driver"	100

G.1.4 All-relative “speed” formula	101
G.1.5 The universe multiplier	103
H. The new „Universal Dynamic(!) Relativity Formula“	104
H.1. The evidence for the „Universal Dynamic Relativity Theory“	108
H.1.1. The expansion limit	108
H.1.2. The matter rupture	112
H.1.3. Rest matter rescue: quasar	114
H.1.4. The contraction limit	115
I. EFFICIENCY	121
J. EFFICIENCY TRANSFER?!	127
J.1. PRINCIPLES	127
J.1.1 Babies and ordinary citizens	127
J.1.2 Lyrics, art & music	128
J.1.3 The brain - the top computer	129
J.2. CHANCES	142
K. THE ALTERNATIVE	145
ANNEX	146

A. INTRODUCTION

Idea. If you search for "idea" on the Internet – and then look at the "pictures" about it, then mostly glowing glow-bulbs appear. Second abundance are rays, third are lightnings, fourth are thought clouds/bubbles, fifth heads and sixth brains. According to the pictures on the Internet, ideas seem to have a lot to do with energy and space. But also with lighting (recognizing something) or epiphany (a light, as sudden idea in the brain). Many images also show processes (if-then-relationships). And hereby often time aspects (processes in the time sequence). The latter is synonymous with a delay in the aspects after an idea: Vision, mission, goal, target, realization. One would very much like to have all at the moment of the emergence of ideas. And with enough free space to enjoy immediately.

Universe grows faster, than humanity can (could) calculate with the formulas at the actual status-quo. Are there (hidden) formulas, which work with more efficiency, than we are used to think of in our models? To get things quicker, immediately? There are. We found some.

An idea, a glow-bulb, indeed illuminates a previously dark area. But the ideas frame is very fragile - made of glass. And each idea was fed in a previously dark area, with “unknown” forces. And apparently these forces as well can interrupt this energy supply at any time.

Quanta appear and disappear here and there as well in universe. Like ideas in our brain.

As well our environment has the power to do so - everything can stay the same, as before, at any time. At least in the corresponding

"environment", like a "controlled" area. The Earth is flat – and the center of the universe. Basta. Galileo-Galilei glow-bulb-glass destroyed. Energy supply stopped via excommunication. No one should be able to think about, nor see reality.

"Enlightenments" should be purely the believe in Good and Church. "Faith" can displace "reality". Unfortunately, far too often.

Everything around this thought construction remains dark, at least for those who sit in that hypothetical construct.

But the rest of the universe is growing. Ever further, ever bigger,...

...always more beautiful, and better, for all.

Not only for a small number of self-appointed rulers.

What is unfortunately not shown in the Internet images is the benefit of an idea. Although almost every idea may be an increase in efficiency.

And so, the simplism (on the Internet) of our first two great researches continues:

- 1) We investigated the "time" – and found as images on the Internet primarily "clocks".
- 2) We examined the "space" and found on the Internet primarily "chambers" as pictures.
- 3) In "ideas" we now find primarily "light-bulbs".

With our formulas for TIME ⁰¹ and SPACE ⁰² in the last two books we showed what is possible if different perspectives and new thoughts are considered and followed up. With ideas that can increase EFFICIENCY, even more is achievable, as we want to show in this book.

According to our formulas, this is also the case in the universe. The central objective of universe - in the course of time - seems to be "efficiency". And looking deeper at this efficiency, since the existence of universe, the primary targets seem to be: "space" and "energy". We should therefore focus this much more on Earth in order to be as efficient as the universe in the course of time.

Ideas are what distinguishes mankind. And what can advance knowledge, wisdom, efficiency, prosperity, peace and freedom. At least, if the environment is "harmonious". And or there is enough "power" i.e. "energy". Energy in astronomy means the "power to do work" and is needed to achieve "results". As in universe, so on our earth. The most popular pictures of power are: energy, pull and push. But there are far more powers, which may lead to many top ideas.

And knowledge, resulting from earlier ideas, is the basis of new ideas. Knowledge is the only raw material that increases when used. If we invested much more in the education of all humanity, the basis for global efficiency-gains, wisdom, ingenuity and thus prosperity would be many times better. Not only
