VORWORT

Die vorliegende Dokumentation zum Lukasevangelium erscheint zeitgleich mit den Matthäusbänden. Alles, was dort im Vorwort und in der Einführung gesagt ist, gilt auch für die beiden Bände zum Lukasevangelium. Wir verweisen daher an dieser Stelle darauf. Unser Dank aber an alle, die zum Abschluß dieses Werkes beigetragen haben und die sein Entstehen ermöglicht haben, wie vor allem die Alfried Krupp von Bohlen und Halbach-Stiftung, er sei hier noch einmal aufrichtig wiederholt.

Münster, den 10. 10. 1998

Barbara Aland

PREFACE

The present documentation for the Gospel of Luke is appearing simultaneously with the volumes on the Gospel of Matthew. All that is said there in the preface and introduction applies also to both volumes on the Gospel of Luke, and the reader is accordingly referred to them. We wish to repeat here our sincere gratitude to all who have contributed to the accomplishment of this work, especially to the Alfried Krupp von Bohlen und Halbach Foundation.

Münster, October 10, 1998

BAND IV.3.2

4. Resultate der Kollation	1
5. Hauptliste.....	137
Beilage: Ergänzungsliste.....	*1-*62

Sigel und Abkürzungen

Zu den Resultaten der Kollation (Bd. 3.2, Kap. 4):

- * erste Hand (korrespondiert immer mit C)
- { } umschließt Textabschnitte, die durch Umstellung in den Bereich einer Teststelle geraten sind, jedoch nicht berücksichtigt werden
- C Korrektur (korrespondiert immer mit *); mehrere Korrekturen an derselben Stelle werden durch angehängte Ziffern unterschieden (C1, C2...)
- HOM. Homoioteleuton oder Homoioarkton
- K Kommentarlesart (nur bei Kommentarhandschriften, korrespondiert immer mit T): vom Lemma abweichende Lesart im Kommentar
- L Marginallesart (korrespondiert immer mit T)
- S Supplement
- T Textlesart, der eine Marginal- oder Kommentarlesart (L oder K) entspricht
- U wahrscheinlich durch Homoioteleuton oder Homoioarkton (beides abgekürzt mit „HOM.“) bedingte längere Auslassung
- V sinnentstellende Auslassung eines längeren Textabschnitts ohne erkennbaren Anlaß
- W unsicher, welche der angegebenen Lesarten von den hier notierten Zeugen gelesen wurde
- X im Mikrofilm bzw. Original unleserlich
- Y Fehler im Mikrofilm, also nicht zu entscheiden
- Z Lücke in der Handschrift

Sigel in der Hauptliste (Bd. 3.2, Kap. 5):

- TS Teststellen
- SL Singulärlesart(en)
- MT Stellen mit Mehrheitstext
- U-Z siehe die Sigel zu den „Resultaten der Kollation“

Signs and Abbreviations

For the collation results (vol. 3.2, chap. 4):

- * first hand (always coordinate with C)
- { } enclosed text due to transposition, and not relevant to test passage
- C correction (always coordinate with *); successive corrections of a reading are enumerated (C1, C2 ...).
- HOM. homoioteleuton or homoioarcton
- K commentary reading (only in commentary manuscripts, and always coordinate with T): a reading in the commentary which differs from the lemma.
- L marginal reading (always coordinate with T)
- S supplement
- T text reading, always coordinate with a marginal or commentary reading (L or K)
- U extensive omission, evidently due to homoioteleuton or homoioarcton (HOM.)
- V senseless omission of a lengthy passage for no apparent reason
- W uncertain which of the given readings is attested by the witnesses listed
- X illegible in the microfilm or in the original
- Y faulty microfilm
- Z lacuna in manuscript

Symbols in the main list (vol. 3.2, chap. 5):

- TS test passages
- SL singular reading(s)
- MT majority text
- U-Z see the symbols for Collation Results

1. Handschriftenliste zum Lukasevangelium

Der folgende Auszug aus der Handschriftenliste zu den synoptischen Evangelien¹ umfaßt die Nummern aller 1787 Handschriften, in denen der fortlaufende Text des Lukasevangeliums vollständig oder fragmentarisch erhalten ist. Zu diesen gehört auch das Papyrusfragment P111 (POxy 4495, 3. Jh., Lk 17,11-13. 22-23), das erst in Kürze in Band LXVI der *Oxyrhynchus Papyri* ediert werden wird.

The following list derived from the List of Synoptic Gospel Manuscripts² comprises all 1,787 manuscripts preserving a continuous text of the Gospel of Luke, complete or fragmentary. Among them is included P111 (POxy 4495, 3 cent., Lk 17,11-13. 22-23), which will be published in the forthcoming volume LXVI of *The Oxyrhynchus Papyri*.

Von diesen Handschriften sind 30 nur in Fragmenten erhalten, die an keiner der 54 Teststellen des Lukasevangeliums Text haben:

P7 P42 P69 P82 P111 055 0108 0116 0130 0147 0155 0177 0181 0182 0239 0265 0266 0267 0279 99 656 2363
 2391 2392 2440 2468 2485 2537 2552 2599 2654.

Für den vorliegenden Band waren also 1756 Handschriften zu bearbeiten und in die verzeichnende Beschreibung (Kap. 3) einzubeziehen. 1532 von diesen Handschriften weichen an höchstens 10% der Teststellen vom Mehrheitstext ab (s. Auswertungsliste 2.1, S. 5f.), 224 Handschriften unterscheiden sich stärker von ihm (s. Auswertungsliste 2.1, S. 7-12). Diese 224 Handschriften werden in den Resultaten der Kollation (Kap. 4) an jeder Teststelle explizit genannt, jene 1532 nur dann, wenn sie von der unter "BYZ" zusammengefaßten Mehrheit abweichen.

Von den 224 an mehr als 10% der Teststellen vom Mehrheitstext abweichenden Handschriften haben die folgenden 18 an weniger als 10 Teststellen Text:

P3 P4 029 079 0102 0115 0135 0291 85 339 434 517 1016 1098 1420 1822 2551 2697.

Diese Handschriften werden wegen ihres geringen Textumfangs über die nach Anteil der Mehrheitslesarten sortierten Handschriftenliste (Kap. 2.1) hinaus nicht in die weiteren Auswertungslisten einbezogen.

The following 30 of these manuscripts are fragmentary, containing none of the 54 test passages for the Gospel of Luke:

P7 P42 P69 P82 P111 055 0108 0116 0130 0147 0155 0177 0181 0182 0239 0265 0266 0267 0279 99 656 2363
2391 2392 2440 2468 2485 2537 2552 2599 2654.

In the present volume accordingly a total of 1,756 manuscripts are examined and included in the descriptive list (chap. 3). A total of 1,532 manuscripts differ no more than 10% from the majority text (cf. Analytical Table 2.1, p. 5f.), while 224 manuscripts show greater differences (cf. Analytical Table 2.1, p. 7-12). These 224 manuscripts are named explicitly in the results of the test passage collations (chap. 4), while the 1,532 manuscripts are named only when they are not subsumed under the symbol "BYZ" representing the majority text.

Of the 224 manuscripts which differ from the majority text in more than 10% of the test passages, the following 18 are represented in less than 10 of the test passages:

P3 P4 029 079 0102 0115 0135 0291 85 339 434 517 1016 1098 1420 1822 2551 2697.

Because of their fragmentary nature these manuscripts are included only in the analytical table sorted by their proportion of majority text readings (chap. 2.1), and not in the remaining analytical tables.

2.6 Gruppierung nach Übereinstimmungsquoten

In der folgenden Tabelle werden für jede Ausgangshandschrift (*Hs.*) die am häufigsten übereinstimmenden Vergleichshandschriften (*Vghs.*) genannt. Eine Vergleichshandschrift wird notiert, wenn sie drei Bedingungen erfüllt. Erstens ist die Quote ihrer Übereinstimmungen bezogen auf die Gesamtzahl gemeinsamer Teststellen (*Übereinstimmungen gesamt*) größer als der Anteil an Mehrheitslesarten der Ausgangshandschrift. Zweitens stimmt sie an mindestens 50% der Teststellen mit der Ausgangshandschrift überein, an denen sie vom Mehrheitstext abweicht (*Übereinstimmungen ohne MT*). Drittens sind mindestens 3 *Übereinstimmungen ohne MT* zu verzeichnen. Alle Ausgangshandschriften gehören zu den 206, für die Haupt- und Ergänzungsliste geboten werden (vgl. o. S. 3). Wenn eine von diesen 206 Handschriften nicht in der *Hs.*-Spalte vorkommt (z. B. 022), gibt es keine Vergleichshandschrift, die alle drei Bedingungen erfüllt.

In the following table manuscripts used as a primary base for comparison (*Hs.*) are listed with the manuscripts most closely related to it (*Vghs.*). A compared manuscript must satisfy three qualifications for it to be considered a closely related manuscript. First, the share of its agreements in relation to the total number of test passages they have in common (*Übereinstimmungen gesamt*) must be greater than the number of majority readings in the primary manuscript. Secondly, it must agree with the primary manuscript in at least 50% of its differences from the majority readings (*Übereinstimmungen ohne MT*). Thirdly, there must be at least three agreements in readings which differ from the majority text. The primary manuscripts are all among the 206 listed in the main list and in the supplementary list (see above, p. 4). If any of the 206 manuscripts does not appear in the following list as a primary manuscript (e.g., 022), it is because there is no closely related manuscript satisfying these three conditions.

Hs.	Vghs.	Übereinstimmungen gesamt	Übereinstimmungen ohne MT	Hs.	Vghs.	Übereinstimmungen gesamt	Übereinstimmungen ohne MT
