CONVENTIONAL AMMUNITION MANAGEMENT

DEVELOPMENTS AND CHALLENGES FROM COVID-19

BY JOVANA CARAPIC

United Nations

The United Nations Office for Disarmament Affairs (UNODA) publishes the UNODA Occasional Papers series to feature, in edited form, papers or statements made at meetings, symposiums, seminars, workshops or lectures that deal with topical issues in the field of arms limitation, disarmament and international security. They are intended primarily for those concerned with these matters in Government, civil society and in the academic community.

The views expressed in this publication are those of the author and do not necessarily reflect those of the United Nations or its Member States.

Material in UNODA Occasional Papers may be reprinted without permission, provided the credit line reads “Reprinted from UNODA Occasional Papers” and specifies the number of the Occasional Paper concerned. Notification to the following e-mail address would be highly appreciated: unoda-web@un.org.

Symbols of United Nations documents are composed of capital letters combined with figures. These documents are available in the official languages of the United Nations at <http://ods.un.org>. Specific disarmament-related documents can also be accessed through the disarmament reference collection at www.un.org/disarmament/publications/library.

Author

Jovana Carapic, Programme Manager, Ammunition Management Advisory Team (AMAT), Geneva International Centre for Humanitarian Demining—Ms. Carapic implements the AMAT four-year strategy by coordinating activities and developing partnerships with donor Governments, national authorities and relevant international and regional organizations. She provides programmatic and policy advice and technical support on ammunition management as requested by States. Prior to joining AMAT, Ms. Carapic was a researcher at the Geneva-based Small Arms Survey. She worked on various projects within the field of weapons and ammunition management, with a focus on South-East Europe. She has authored several publications on ammunition life-cycle management, unplanned explosions at munitions sites, as well as training and capacity-building in physical security and stockpile management.
