Forensic Analysis on the Cutting Edge

THE WILEY BICENTENNIAL—KNOWLEDGE FOR GENERATIONS

Each generation has its unique needs and aspirations. When Charles Wiley first opened his small printing shop in lower Manhattan in 1807, it was a generation of boundless potential searching for an identity. And we were there, helping to define a new American literary tradition. Over half a century later, in the midst of the Second Industrial Revolution, it was a generation focused on building the future. Once again, we were there, supplying the critical scientific, technical, and engineering knowledge that helped frame the world. Throughout the 20th Century, and into the new millennium, nations began to reach out beyond their own borders and a new international community was born. Wiley was there, expanding its operations around the world to enable a global exchange of ideas, opinions, and know-how.

For 200 years, Wiley has been an integral part of each generation's journey, enabling the flow of information and understanding necessary to meet their needs and fulfill their aspirations. Today, bold new technologies are changing the way we live and learn. Wiley will be there, providing you the must-have knowledge you need to imagine new worlds, new possibilities, and new opportunities.

Generations come and go, but you can always count on Wiley to provide you the knowledge you need, when and where you need it!

WILLIAM J. PESCE
PRESIDENT AND CHIEF EXECUTIVE OFFICER
PETER BOOTH WILEY
CHAIRMAN OF THE BOARD

Contents

Preface	xvii
Foreword	xix
Contributors	xxiii
1. All that Glitters <i>Is</i> Gold!	1
<i>Robert D. Blackledge and Edwin L. Jones, Jr.</i>	
1.1	What Is Glitter? / 1
1.2	The Ideal Contact Trace / 2
1.2.1	Nearly Invisible / 2
1.2.2	High Probability of Transfer and Retention / 3
1.2.3	Highly Individualistic / 3
1.2.4	Quickly and Easily Collected, Separated, and Concentrated / 8
1.2.5	Easily Characterized / 9
1.2.6	Computerized Database Capability / 9
1.3	Characterization Methods / 10
1.3.1	Color / 11
1.3.2	Morphology / 12
1.3.3	Shape / 13
1.3.4	Size / 13
1.3.5	Specific Gravity / 13
1.3.6	Thickness / 14
1.3.7	Cross Section / 15
1.3.8	Infrared Spectra / 16

1.3.9	Raman Microspectroscopy / 19	
1.3.10	Scanning Electron Microscopy/Energy Dispersive Spectroscopy / 22	
1.4	Glitter as Evidence in Criminal Cases / 24	
	References / 31	
2.	Forensic Analysis of Automotive Airbag Contact—Not Just a Bag of Hot Air	33
	<i>Glenn D. Schubert</i>	
2.1	History of Airbags / 34	
2.2	How Do Airbags Work? / 34	
2.3	Types of Forensic Evidence to Look for / 35	
2.4	Airbag Case Reports and Examples / 39	
2.5	Changes that Are Occurring / 54	
2.6	Final Discussion / 55	
	References / 55	
3.	Ink Analysis Using UV Laser Desorption Mass Spectrometry	57
	<i>John Allison</i>	
3.1	Introduction / 57	
3.2	The Instrumentation / 58	
3.3	The Analyte Target Molecules / 63	
3.4	LDMS for the Analysis of Dyes in Pen Inks / 64	
3.5	Related Applications / 74	
3.6	LDMS Analyses that “Don’t Work” / 75	
3.7	Conclusions / 76	
	Acknowledgments / 77	
	References / 77	
4.	Condom Trace Evidence in Sexual Assaults: Recovery and Characterization	81
	<i>Wolfgang Keil</i>	
4.1	Introduction / 81	
4.1.1	Forensic Significance / 81	
4.1.2	Production, Sale, and Use of Condoms / 82	
4.1.3	Condom Production / 85	
4.2	Examination for Condom Residue Traces / 88	
4.3	Forensic Evaluation of the Substances and Examinations / 96	
4.4	Case Studies / 105	
	References / 111	

5. Latent Invisible Trace Evidence: Chemical Detection Strategies 115

Gabor Patonay, Brian Eckenrode, James John Krutak, Jozef Salon, and Lucjan Strekowski

- 5.1 Introduction / 115
- 5.2 Latent Bloodstain Detection / 117
- 5.3 Fingerprint Detection with Near-Infrared Dyes / 000
- 5.4 Pepper Spray Detection / 130
 - 5.4.1 Pepper Spray Detection Using Near-Infrared Fluorescent Dyes / 131
 - 5.4.2 Pepper Spray Detection Using Chemical Derivatization / 133

References / 138

6. Applications of Cathodoluminescence in Forensic Science 141

Christopher S. Palenik and JoAnn Buscaglia

- 6.1 Introduction / 141
- 6.2 Theory / 143
 - 6.2.1 Luminescence Terminology / 143
 - 6.2.2 Electron Source / 143
 - 6.2.3 Cathodoluminescence / 144
 - 6.2.4 Limitations / 147
- 6.3 Instrumentation / 147
 - 6.3.1 Electron Source / 147
 - 6.3.2 Microscope / 149
 - 6.3.3 Camera / 149
 - 6.3.4 Spectrometer / 150
 - 6.3.5 SEM-CL / 150
- 6.4 Techniques and Forensic Considerations / 151
 - 6.4.1 Instrumental Conditions / 151
 - 6.4.2 Sample Preparation and Preservation / 152
 - 6.4.3 Image Collection / 153
 - 6.4.4 Spectral Collection / 154
 - 6.4.5 Luminescence Fading / 155
 - 6.4.6 Sample Alteration / 155
- 6.5 Luminescent Minerals / 156
 - 6.5.1 Calcium Carbonate Group / 156
 - 6.5.2 Feldspar Group / 159
 - 6.5.3 Quartz / 160
 - 6.5.4 Accessory Minerals / 163
- 6.6 Forensic Applications / 164
 - 6.6.1 Screening and Comparison / 165

6.6.2	Identification / 165
6.6.3	Authentication / 166
6.6.4	Provenance / 166
6.7	Geological Samples: Soil and Sand / 167
6.8	Anthropogenic Materials / 168
6.8.1	Cement and Concrete / 168
6.8.2	Slag, Fly Ash, and Bottom Ash / 168
6.8.3	Glass / 169
6.8.4	Paint / 170
6.8.5	Duct Tape / 170
6.9	Conclusions and Outlook / 171
	Acknowledgments / 171
	References / 172

7. Forensic Application of DART™ (Direct Analysis in Real Time) Mass Spectrometry

175

James A. Laramée, Robert B. Cody, J. Michael Nilles, and H. Dupont Durst

7.1	Introduction / 175
7.2	Experimental / 176
7.3	Drug and Pharmaceutical Analysis / 177
7.3.1	Confiscated Samples / 178
7.3.2	Endogenous Drugs / 178
7.3.3	Drug Residues on Surfaces / 179
7.4	Samples from the Human Body / 180
7.4.1	Fingerprints / 180
7.4.2	Bodily Fluids / 181
7.5	Condom Lubricants / 184
7.6	Dyes / 184
7.6.1	Self-Defense Sprays / 184
7.6.2	Currency-Pack Dye / 185
7.7	Explosives / 185
7.8	Arson Accelerants / 188
7.9	Chemical Warfare Agents / 189
7.10	Elevated-Temperature DART for Material Identification / 190
7.11	Glues / 191
7.12	Plastics / 191
7.13	Fibers / 192
7.14	Identification of Inks / 193
7.15	Conclusion / 194
	Acknowledgments / 194
	References / 194

8. Forensic Analysis of Dyes in Fibers Via Mass Spectrometry 197*Linda A. Lewis and Michael E. Sigman*

- 8.1 Introduction / 197
- 8.2 Conventional Fiber Color Comparison Methods Employed in Forensic Laboratories / 198
- 8.3 Shortcomings Associated with UV–Vis Based Comparative Analysis for Trace-Fiber Color Evaluations / 199
- 8.4 General Overview of Modern Dye Ionization Techniques for Mass Analysis / 203
- 8.5 Trace-Fiber Color Discrimination by Direct ESI-MS Analysis / 204
- 8.6 Examples of Negative Ion ESI-MS Analysis of Colored Nylon Windings / 207
- 8.7 Examples of Tandem Mass Spectrometry (MS/MS) Applications to Elucidate Structure / 208
- 8.8 LC-MS Analysis of Dyes Extracted from Trace Fibers / 210
- 8.9 Proposed Protocols to Compare Trace-Fiber Extracts / 214
 - 8.9.1 Direct Infusion MS/MS Protocol / 214
 - 8.9.2 Generalized LC-MS and LC-MS/MS Protocol / 216
- 8.10 Conclusions / 217
- Acknowledgments / 217
- References / 217

9. Characterization of Surface-Modified Fibers 221*Robert D. Blackledge and Kurt Gaenzle*

- 9.1 Fibers as Associative Evidence / 221
- 9.2 Surface-Modified Fibers / 222
- 9.3 Preliminary Examinations / 222
 - 9.3.1 Infrared Spectra and Properties Measured by Polarized Light Microscopy / 223
 - 9.3.2 Infrared Mapping with an FTIR Microscope / 223
 - 9.3.3 Raman Mapping / 224
 - 9.3.4 AATCC Test Method 118-2002 / 224
 - 9.3.5 A Simple Example / 224
- 9.4 Distinguishing Tests / 225
 - 9.4.1 Scanning Electron Microscopy/Energy Dispersive Spectroscopy / 225
 - 9.4.2 Gas Chromatography/Mass Spectrometry / 231
 - 9.4.3 Pyrolysis Gas Chromatography/Mass Spectrometry / 234
- Acknowledgments / 238
- References / 238

10. Characterization of Smokeless Powders **241**

Wayne Moorehead

- 10.1 Introduction / 241
- 10.2 Purpose of Analysis / 242
 - 10.2.1 Identification of Smokeless Powder / 242
 - 10.2.2 Determining Brand / 242
- 10.3 Brief History of Smokeless Powder / 243
- 10.4 Characterization Toward Smokeless Powder Identification / 245
- 10.5 Characterization Toward Brand Identification / 246
 - 10.5.1 Characterization by Morphology / 246
 - 10.5.2 Micromorphology / 247
 - 10.5.3 Other Characteristics / 257
- 10.6 Micrometry / 258
- 10.7 Mass / 259
- 10.8 FTIR Spectroscopy / 260
 - 10.8.1 Transmission Micro-FTIR / 260
 - 10.8.2 ATR-FTIR / 261
- 10.9 Chromatography with Mass Spectrometry / 262
 - 10.9.1 Gas Chromatography / 263
 - 10.9.2 Liquid Chromatography / 265
- 10.10 Conclusion / 266
- References / 266

11. Glass Cuts **269**

Helen R. Griffin

- 11.1 A Homicide / 270
- 11.2 A Robbery / 271
- 11.3 A Hit and Run / 274
- 11.4 Cutting Versus Tearing / 276
- 11.5 Slash Cuts Made by Glass / 279
 - 11.5.1 Associated Glass / 280
 - 11.5.2 Fabric Type / 280
 - 11.5.3 Blade Characteristics / 280
- 11.6 Conclusion / 287
- Acknowledgments / 287
- References / 289
- Additional Sources / 289

12. Forensic Examination of Pressure Sensitive Tape **291**

Jenny M. Smith

- 12.1 Introduction / 291
- 12.2 Product Variability / 292

12.3	Tape Construction / 293
12.3.1	Tape Backings / 296
12.3.2	Adhesive Formulations / 297
12.3.3	Common Reinforcement Fabrics / 299
12.4	Duct Tape / 299
12.5	Electrical Tape / 307
12.6	Polypropylene Packaging Tape / 309
12.6.1	Oriented Films / 310
12.6.2	Polarized Light Microscopy Examinations of Packing Tapes / 310
12.6.3	Is It MOPP or BOPP? / 311
12.6.4	Thickness / 312
12.6.5	Degree of Offset from the Machine Edge / 313
12.7	Strapping/Filament Tapes / 313
12.8	Masking Tape / 315
12.9	Initial Handling / 316
12.9.1	Sharing Evidence with Other Sections / 317
12.9.2	Untangling Tape and Recovering Trace Evidence / 318
12.10	Methods / 318
12.10.1	Physical End Matching / 318
12.10.2	Physical Characteristics / 319
12.10.3	Separation of Backing, Reinforcement, and Adhesive / 319
12.10.4	FTIR Analysis / 320
12.10.5	Elemental Analysis / 320
12.10.6	Polarized Light Microscopy / 325
12.10.7	Pyrolysis GC/MS / 326
12.10.8	Sourcing Tape Products to a Manufacturer / 326
12.11	Case Example / 327
	Acknowledgments / 329
	References / 329
	Additional Sources / 331

13. Discrimination of Forensic Analytical Chemical Data Using Multivariate Statistics

333

Stephen L. Morgan and Edward G. Bartick

13.1	Patterns in Data / 333
13.2	Experimental Design and Preprocessing / 336
13.3	Dimensionality Reduction by Principal Component Analysis for Visualizing Multivariate Data / 342
13.4	Visualizing Group Differences by Linear Discriminant Analysis / 348
13.5	Group Separation, Classification Accuracy, and Outlier Detection / 354
