*To My Family,
In case you were wondering, this is where all that time went.*

CONTENTS

PREFACE AND ACKNOWLEDGMENTS	xv
PART A GENERAL CONCEPTS	1
1. Introduction	3
General Discussion, 3	
Key Definitions, 6	
The Interacting Parties, 6	
Extractables versus Leachables, 7	
Regulatory Perspectives for Performing Compatibility and/or Safety Assessments, 13	
The U.S. Food and Drug Administration Guidance for Industry: Container Closure Systems for Packaging Human Drugs and Biologics, 14	
European Medicines Agency (EMA) Guideline on Plastic Immediate Packaging Materials, 15	
FDA Guidance for Industry, Inhalation Products, 18	
Medical Devices, 20	
An Overview of Strategies for Performing Safety Assessments, 21	
The Generalized Strategy for Safety Assessments, 22	
Moving Forward, 24	
References, 25	

2. Nomenclature and General Concepts 27

General, 27

Nomenclature, 27

Primary Definitions, 28

Constituents of a Material or Construct, 29

Classification of Extracting Media, 31

Classification of Extraction Strategies, 32

Example Extraction Conditions Applied to a Model
System, 39

Correlation, 43

Factors That Influence the Linking of Extractables and
Leachables, 44A Hierarchy for Linkages between Extractables and
Leachables, 44

Decisions Concerning the Required Rigor for Linkages, 47

Circumstances Requiring the Linking of Extractables and
Leachables, 48

Identification and Quantitation, 50

Risks and Risk Management, 55

Risk Categories Related to Biological Assessment of Medical
Devices, 58Risk Categories Related to Assessment of Primary Packaging
and/or Container–Closure Systems, 58

The General Dimensions of Risk, 64

Utilization of Risk Classification Profiles, 68

Risk Classification in Indirect Contact Situations, 71

The Construct Itself as a Contributor to Risk, 73

References, 74

3. Extractables, Leachables, and the Product Life Cycle 77

General, 77

Discussion of the Components of the Master Flow Diagram, 78

Observations, 83

Application of the Process Map, 87

PART B MATERIAL CHARACTERIZATION 89**4. Material Screening and Characterization 91**

Overview, 91

General Principles, 94

Compendial Compliance, 97	
United States Pharmacopeia, 98	
Japanese Pharmacopeia, 101	
European Pharmacopeia, 102	
Compositional Characterization, General Concepts, 103	
Compositional Characterization by Collecting Available	
Material Information, 104	
General, 104	
Collecting Extractables Information from the Material	
Supplier, 106	
Compositional Characterization by Material Testing,	
Extractables Survey, 112	
Extractables Survey: Extraction, 112	
Case Studies: The Influence of Extraction Medium on the	
Extractables Survey, 121	
Extractables Survey: Extract Analysis, 124	
Case Study: Extractables Survey for Plastic Tubing	
Materials, 131	
Case Study: Extractables Survey for an Elastomer Used in	
OINDP, 136	
Case Study: Extractables Survey for a Rubber Closure Used	
with Semisolid Drug Products, 137	
Case Study: Extractables Survey for Filter Cartridges Used in	
Downstream Processing of Pharmaceuticals, 138	
Bibliography of Analytical Methods, 139	
Reconciliation as a Survey Tool, 140	
Case Study: TOC Reconciliation; Characterization of a	
Polyolefin Material, 141	
Use of Extractables Information in Safety Assessment:	
Extractables Profile, Total Pool, and Total Available	
Pool, 142	
Extractions to Establish the Total Pool and Total Available	
Pool, 143	
Case Study: Total Pool Determination by Successive	
Extraction, 145	
Recap: Components of a Complete Extractables	
Assessment, 146	
Caveats in Using Extractables Information for Safety	
Assessment, 149	
Chemical Characterization: Device Perspective per ISO	
10993-18, 152	
References, 154	

PART C CONSTRUCT QUALIFICATION 157

5. The Prototype Stage 159

- General Comments, 159
- The Simulation Study, 161
 - Generating the Simulating Extract, 162
 - Simulating the Contact Parameters, 164
 - Simulating the Therapeutic Product, 166
 - Simulating the Exposure Parameters, 169
 - Analyzing the Simulating Extract, 171
 - Case Study: Modeling of the Impact of Solubilizing Agents on Leachables Accumulation, 172
 - Case Study: Accumulation of Organic Leachables from Plastic Biopharmaceutical Process Containers, 174
 - Case Study: Accumulation of Label-Related Leachables in a Solid Dosage Form, 179
 - Case Study: Accumulation of Caprolactam Oligomers Leached from Nylon-6 Material, 180
 - Application of the Analytical Threshold, 181
- The Preliminary Toxicological Assessment, 184
 - Case Study: Assessment of Cyclohexanone Limits for Containers, 188
- Exiting the Prototype Stage, 188
- References, 189

6. The Early Development Stage 191

- General Comments, 191
- Target Leachables, 192
- Method Development, Evaluation, and Validation, 194
 - Method Development (Optimization), 195
 - Prerequisites to Method Optimization, 195
 - Overview of the Method Optimization Process, 197
 - Conduct of a Method Optimization Study, 200
 - Primary Performance Assessment, 201
 - Troubleshooting Guide, 202
 - Secondary Performance Assessment, 204
 - System Suitability, 205
 - Robustness, 205
 - Exiting Method Development–Optimization, 206
- The Method Evaluation Process, 206
 - General, 206
 - Aspects of the Evaluation and Validation Processes, 207

Overview of the Method Evaluation Process, 207	
Template for the Conduct of a Method Evaluation Study, 209	
Validation, 214	
Case Study: Validation of an LC/MS Method for the	
Quantitation of Leachables from a Packaging System, 215	
General, 215	
Experimental, 216	
Validation Study, 218	
Case Study: Validation of an HPLC Method For Quantitating	
Stopper Leachables in a Complex Surfactant Vehicle, 225	
General, 225	
Validation, 225	
Exiting the Early Development Stage, 228	
References, 228	

PART D CONSTRUCT VALIDATION **229**

7. Late Stage Product Development **231**

General: The Migration Study, 231	
Design of the Migration Study, 233	
EMA Guideline on Plastic Immediate Packaging	
Materials, 233	
FDA Guidance, 233	
Optimal Design of a Migration Study, 234	
Interpretation of the Migration Study: Toxicological	
Assessment, 238	
Disaster Management, 238	
Class A Disaster: Unusual or Unexpected Change in the	
Concentration of a Target Leachable, 239	
Class B Disaster: A Previously Unobserved Response Is	
Obtained During Testing, 241	
Documenting a Disaster Investigation, 242	
Specificity Check in Drug Product Analysis Methods, 242	
Product Stability Issues Associated with Leachables, 244	
References, 245	

8. Submission **249**

General Discussion, 249	
Dossier Format: The Common Technical Document, 250	

Contents of the CTD Sections Relevant to Container Closure Systems and Their Safety Assessment, 252	
Section 3.2.P.7, Description, 252	
Section 3.2.P.2.4, Suitability, 254	
Closing Observations, 262	
References, 263	

9. Launch	265
------------------	------------

PART E PRODUCT MAINTENANCE	271
-----------------------------------	------------

10. Product Maintenance	273
--------------------------------	------------

General Discussion, 273	
Ongoing Quality Control, 275	
General, 275	
Incoming Raw Materials, 275	
Manufactured In-Process Goods, 278	
Finished Goods (Final Product), 279	
Process of Developing–Implementing QC Extractables Specifications, 281	
Change Control, 282	
General, 282	
Change Control Impact Assessment, 285	
Evaluation Recommendation, 295	
Factors to Consider When Contemplating Changes to Registered Products, 296	
Case Study: Differential Approach, 297	
Overview, 297	
General Test Strategy, 297	
Experimental, 298	
Results and Discussion, 299	
Principles for Judging Toxicological Equivalency, 304	
Disaster Management During Product Maintenance, 305	
Atypical Manufacturing During Product Maintenance, 305	
Product Use Field Issues Encountered During Product Maintenance, 309	
Changes in Product Registration Requirements During Product Maintenance, 312	
Exiting the Product Maintenance Stage, 313	
References, 313	

11. Retirement	315
12. Focus on Emerging Concepts	319
Overview, 319	
Plastic Materials used in Manufacturing Applications, 320	
General, 320	
Regulatory Requirements, 321	
Industry Recommendations, 322	
Case Study: Leachables Evaluation for Bulk Drug Substance, 326	
Process for Performing Extractables and Leachables Assessments for Disposable Materials Used in Bioprocessing, 327	
A Matter of Semantics, 328	
Best Demonstrated Practices in Extractables Assessments, 331	
The Broader Context of Suitability for Use, 337	
An Important Practical Consideration, 340	
Future Considerations, 342	
References, 344	
Appendix: Materials Used in Pharmaceutical Constructs and Their Associated Extractables	347
References, 370	
INDEX	371
