Contents

List of Figures	xv
List of Tables	xvii
Preface	xix
Acknowledgments	xxiii
Acronyms and Notation	xxv
 Part One INTRODUCTION AND BACKGROUND	
Introduction	3
References	3
 1 Introduction to Importance Measures	 5
References	12
 2 Fundamentals of Systems Reliability	 15
2.1 Block Diagrams	15
2.2 Structure Functions	16
2.3 Coherent Systems	19
2.4 Modules within a Coherent System	20
2.5 Cuts and Paths of a Coherent System	22
2.6 Critical Cuts and Critical Paths of a Coherent System	24
2.7 Measures of Performance	27
2.7.1 Reliability for a Mission Time	27
2.7.2 Reliability Function (of Time t)	29
2.7.3 Availability Function	31
2.8 Stochastic Orderings	32
2.9 Signature of Coherent Systems	33
2.10 Multilinear Functions and Taylor (Maclaurin) Expansion	35
2.11 Redundancy	37
2.12 Reliability Optimization and Complexity	38
2.13 Consecutive- k -out-of- n Systems	39
2.14 Assumptions	41
References	42

Part Two PRINCIPLES OF IMPORTANCE MEASURES

Introduction	47
References	47
3 The Essence of Importance Measures	49
3.1 Importance Measures in Reliability	49
3.2 Classifications	50
3.2 c -Type and p -Type Importance Measures	51
3.4 Importance Measures of a Minimal Cut and a Minimal Path	51
3.5 Terminology	52
References	53
4 Reliability Importance Measures	55
4.1 The B-reliability Importance	55
4.1.1 <i>The B-reliability Importance for System Functioning and for System Failure</i>	61
4.1.2 <i>The Criticality Reliability Importance</i>	61
4.1.3 <i>The Bayesian Reliability Importance</i>	62
4.2 The FV Reliability Importance	63
4.2.1 <i>The c-FV Reliability Importance</i>	63
4.2.2 <i>The p-FV Reliability Importance</i>	63
4.2.3 <i>Decomposition of State Vectors</i>	64
4.2.4 <i>Properties</i>	65
References	67
5 Lifetime Importance Measures	69
5.1 The B-time-dependent-lifetime Importance	69
5.1.1 <i>The Criticality Time-dependent Lifetime Importance</i>	71
5.2 The FV Time-dependent Lifetime Importance	72
5.2.1 <i>The c-FV Time-dependent Lifetime Importance</i>	72
5.2.2 <i>The p-FV Time-dependent Lifetime Importance</i>	74
5.2.3 <i>Decomposition of State Vectors</i>	75
5.3 The BP Time-independent Lifetime Importance	75
5.4 The BP Time-dependent Lifetime Importance	81
5.5 Numerical Comparisons of Time-dependent Lifetime Importance Measures	82
5.6 Summary	84
References	85
6 Structure Importance Measures	87
6.1 The B-i.i.d. Importance and B-structure Importance	87
6.2 The FV Structure Importance	90
6.3 The BP Structure Importance	91
6.4 Structure Importance Measures Based on the B-i.i.d. Importance	94

6.5	The Permutation Importance and Permutation Equivalence	95
6.5.1	<i>Relations to Minimal Cuts and Minimal Paths</i>	96
6.5.2	<i>Relations to Systems Reliability</i>	100
6.6	The Domination Importance	101
6.7	The Cut Importance and Path Importance	103
6.7.1	<i>Relations to the B-i.i.d. Importance</i>	104
6.7.2	<i>Computation</i>	107
6.8	The Absoluteness Importance	109
6.9	The Cut-path Importance, Min-cut Importance, and Min-path Importance	109
6.10	The First-term Importance and Rare-event Importance	111
6.11	<i>c</i> -type and <i>p</i> -type of Structure Importance Measures	112
6.12	Structure Importance Measures for Dual Systems	112
6.13	Dominant Relations among Importance Measures	114
6.13.1	<i>The Absoluteness Importance with the Domination Importance</i>	114
6.13.2	<i>The Domination Importance with the Permutation Importance</i>	114
6.13.3	<i>The Domination Importance with the Min-cut Importance and Min-path Importance</i>	115
6.13.4	<i>The Permutation Importance with the FV Importance</i>	115
6.13.5	<i>The Permutation Importance with the Cut-path Importance, Min-cut Importance, and Min-path Importance</i>	119
6.13.6	<i>The Cut-path Importance with the Cut Importance and Path Importance</i>	120
6.13.7	<i>The Cut-path Importance with the B-i.i.d. Importance</i>	121
6.13.8	<i>The B-i.i.d. Importance with the BP Importance</i>	122
6.14	Summary	122
	References	126
7	Importance Measures of Pairs and Groups of Components	127
7.1	The Joint Reliability Importance and Joint Failure Importance	128
7.1.1	<i>The Joint Reliability Importance of Dependent Components</i>	130
7.1.2	<i>The Joint Reliability Importance of Two Gate Events</i>	131
7.1.3	<i>The Joint Reliability Importance for k-out-of-n Systems</i>	132
7.1.4	<i>The Joint Reliability Importance of Order k</i>	133
7.2	The Differential Importance Measure	133
7.2.1	<i>The First-order Differential Importance Measure</i>	133
7.2.2	<i>The Second-order Differential Importance Measure</i>	135
7.2.3	<i>The Differential Importance Measure of Order k</i>	135
7.3	The Total Order Importance	136
7.4	The Reliability Achievement Worth and Reliability Reduction Worth	137
	References	139

8	Importance Measures for Consecutive-k-out-of-n Systems	141
8.1	Formulas for the B-importance	141
8.1.1	<i>The B-reliability Importance and B-i.i.d. Importance</i>	142
8.1.2	<i>The B-structure Importance</i>	144
8.2	Patterns of the B-importance for Lin/Con/ k/n Systems	145
8.2.1	<i>The B-reliability Importance</i>	146
8.2.2	<i>The Uniform B-i.i.d. Importance</i>	146
8.2.3	<i>The Half-line B-i.i.d. Importance</i>	149
8.2.4	<i>The Nature of the B-i.i.d. Importance Patterns</i>	149
8.2.5	<i>Patterns with Respect to p</i>	152
8.2.6	<i>Patterns with Respect to n</i>	153
8.2.7	<i>Disproved Patterns and Conjectures</i>	155
8.3	Structure Importance Measures	159
8.3.1	<i>The Permutation Importance</i>	160
8.3.2	<i>The Cut-path Importance</i>	160
8.3.3	<i>The BP Structure Importance</i>	160
8.3.4	<i>The First-term Importance and Rare-event Importance</i>	161
	References	162

Part Three IMPORTANCE MEASURES FOR RELIABILITY DESIGN

	Introduction	167
	References	167
9	Redundancy Allocation	169
9.1	Redundancy Importance Measures	170
9.2	A Common Spare	172
9.2.1	<i>The Redundancy Importance Measures</i>	172
9.2.2	<i>The Permutation Importance</i>	174
9.2.3	<i>The Cut Importance and Path Importance</i>	175
9.3	Spare Identical to the Respective Component	175
9.3.1	<i>The Redundancy Importance Measures</i>	175
9.3.2	<i>The Permutation Importance</i>	177
9.4	Several Spares in a k -out-of- n System	178
9.5	Several Spares in an Arbitrary Coherent System	178
9.6	Cold Standby Redundancy	180
	References	180
10	Upgrading System Performance	183
10.1	Improving Systems Reliability	184
10.1.1	<i>Same Amount of Improvement in Component Reliability</i>	185
10.1.2	<i>A Fractional Change in Component Reliability</i>	186
10.1.3	<i>Cold Standby Redundancy</i>	187
10.1.4	<i>Parallel Redundancy</i>	187
10.1.5	<i>Example and Discussion</i>	187

10.2	Improving Expected System Lifetime	188
10.2.1	<i>A Shift in Component Lifetime Distributions</i>	189
10.2.2	<i>Exactly One Minimal Repair</i>	189
10.2.3	<i>Reduction in the Proportional Hazards</i>	197
10.2.4	<i>Cold Standby Redundancy</i>	199
10.2.5	<i>A Perfect Component</i>	201
10.2.6	<i>An Imperfect Repair</i>	201
10.2.7	<i>A Scale Change in Component Lifetime Distributions</i>	202
10.2.8	<i>Parallel Redundancy</i>	202
10.2.9	<i>Comparisons and Numerical Evaluation</i>	203
10.3	Improving Expected System Yield	205
10.3.1	<i>A Shift in Component Lifetime Distributions</i>	206
10.3.2	<i>Exactly One Minimal Repair, Cold Standby Redundancy, a Perfect Component, and Parallel Redundancy</i>	213
10.4	Discussion	215
	References	215
11	Component Assignment in Coherent Systems	217
11.1	Description of Component Assignment Problems	218
11.2	Enumeration and Randomization Methods	220
11.3	Optimal Design Based on the Permutation Importance and Pairwise Exchange	220
11.4	Invariant Optimal and Invariant Worst Arrangements	222
11.5	Invariant Arrangements for Parallel-series and Series-parallel Systems	224
11.6	Consistent B-i.i.d. Importance Ordering and Invariant Arrangements	225
11.7	Optimal Design Based on the B-reliability Importance	228
11.8	Optimal Assembly Problems	230
	References	231
12	Component Assignment in Consecutive-k-out-of-n and Its Variant Systems	233
12.1	Invariant Arrangements for $Con/k/n$ Systems	234
12.1.1	<i>Invariant Optimal Arrangements for $Lin/Con/k/n$ Systems</i>	234
12.1.2	<i>Invariant Optimal Arrangements for $Cir/Con/k/n$ Systems</i>	235
12.1.3	<i>Consistent B-i.i.d. Importance Ordering and Invariant Arrangements</i>	237
12.2	Necessary Conditions for Component Assignment in $Con/k/n$ Systems	237
12.3	Sequential Component Assignment Problems in $Con/2/n:F$ Systems	241
12.4	Consecutive-2 Failure Systems on Graphs	243
12.4.1	<i>Consecutive-2 Failure Systems on Trees</i>	243
12.5	Series $Con/k/n$ Systems	244
12.5.1	<i>Series $Con/2/n:F$ Systems</i>	245
12.5.2	<i>Series $Lin/Con/k/n:G$ Systems</i>	245
12.6	Consecutive- k -out-of- r -from- n Systems	247

12.7	Two-dimensional and Redundant $Con/k/n$ Systems	249
12.7.1	$Con/(r, k)/(r, n)$ Systems	251
12.8	Miscellaneous	253
	References	254
13	B-importance-based Heuristics for Component Assignment	257
13.1	The Kontoleon Heuristic	258
13.2	The LK-Type Heuristics	259
13.2.1	The LKA Heuristic	259
13.2.2	Another Three LK-type Heuristics	261
13.2.3	Relation to Invariant Optimal Arrangements	262
13.2.4	Numerical Comparisons of the LK-type Heuristics	263
13.3	The ZK-Type Heuristics	264
13.3.1	Four ZK-type Heuristics	264
13.3.2	Relation to Invariant Optimal Arrangements	266
13.3.3	Comparisons of Initial Arrangements	267
13.3.4	Numerical Comparisons of the ZK-type Heuristics	268
13.4	The B-importance-based Two-stage Approach	268
13.4.1	Numerical Comparisons with the GAMS/CoinBomin Solver and Enumeration Method	269
13.4.2	Numerical Comparisons with the Randomization Method	270
13.5	The B-importance-based Genetic Local Search	271
13.5.1	The Description of Algorithm	271
13.5.2	Numerical Comparisons with the B-importance-based Two-stage Approach and a Genetic Algorithm	275
13.6	Summary and Discussion	277
	References	279

Part Four RELATIONS AND GENERALIZATIONS

	Introduction	283
	Reference	283
14	Comparisons of Importance Measures	285
14.1	Relations to the B-importance	286
14.2	Rankings of Reliability Importance Measures	288
14.2.1	Using the Permutation Importance	288
14.2.2	Using the Permutation Importance and Joint Reliability Importance	290
14.2.3	Using the Domination Importance	291
14.2.4	Summary	291
14.3	Importance Measures for Some Special Systems	292
14.4	Computation of Importance Measures	293
	References	294

15	Generalizations of Importance Measures	297
15.1	Noncoherent Systems	297
15.1.1	<i>Binary Monotone Systems</i>	298
15.2	Multistate Coherent Systems	300
15.2.1	<i>The μ, ν B-importance</i>	301
15.2.2	<i>The μ, ν Cut Importance</i>	302
15.3	Multistate Monotone Systems	304
15.3.1	<i>The Permutation Importance</i>	305
15.3.2	<i>The Utility-decomposition Reliability Importance</i>	306
15.3.3	<i>The Utility B-reliability Importance</i>	307
15.3.4	<i>The Utility B-structure Importance, Joint Structure Importance, and Joint Reliability Importance</i>	308
15.4	Binary-Type Multistate Monotone Systems	310
15.4.1	<i>The B-TDL Importance, BP TIL Importance, and L_1 TIL Importance</i>	311
15.5	Summary of Importance Measures for Multistate Systems	313
15.6	Continuum Systems	314
15.7	Repairable Systems	317
15.7.1	<i>The B-availability Importance</i>	318
15.7.2	<i>The c-FV Unavailability Importance</i>	318
15.7.3	<i>The BP Availability Importance</i>	318
15.7.4	<i>The L_1 TIL Importance</i>	320
15.7.5	<i>Simulation-based Importance Measures</i>	321
15.8	Applications in the Power Industry	322
	References	323

Part Five BROAD IMPLICATIONS TO RISK AND MATHEMATICAL PROGRAMMING

	Introduction	329
	References	329
16	Networks	331
16.1	Network Flow Systems	331
16.1.1	<i>The Edge Importance Measures in a Network Flow System</i>	332
16.1.2	<i>The Edge Importance Measures for a Binary Monotone System</i>	334
16.1.3	<i>The B-importance, FV Importance, Reliability Achievement Worth, and Reliability Reduction Worth</i>	336
16.1.4	<i>The Flow-based Importance and Impact-based Importance</i>	338
16.2	$\mathbb{K}$ -terminal Networks	339
16.2.1	<i>Importance Measures of an Edge</i>	341
16.2.2	<i>A $\mathbb{K}$-terminal Optimization Problem</i>	343
	References	344

17	Mathematical Programming	345
17.1	Linear Programming	346
17.1.1	<i>Basic Concepts</i>	346
17.1.2	<i>The Simplex Algorithm</i>	348
17.1.3	<i>Sensitivity Analysis</i>	350
17.2	Integer Programming	352
17.2.1	<i>Basic Concepts and Branch-and-bound Algorithm</i>	353
17.2.2	<i>Branch-and-bound Using Linear Programming Relaxations</i>	356
17.2.3	<i>Mixed Integer Nonlinear Programming</i>	359
	References	359
18	Sensitivity Analysis	361
18.1	Local Sensitivity and Perturbation Analysis	361
18.1.1	<i>The B-reliability Importance</i>	361
18.1.2	<i>The Multidirectional Sensitivity Measure</i>	362
18.1.3	<i>The Multidirectional Differential Importance Measure and Total Order Importance</i>	368
18.1.4	<i>Perturbation Analysis</i>	369
18.2	Global Sensitivity and Uncertainty Analysis	371
18.2.1	<i>ANOVA-decomposition-based Global Sensitivity Measures</i>	371
18.2.2	<i>Elementary-effect-based Global Sensitivity Measures</i>	376
18.2.3	<i>Derivative-based Global Sensitivity Measures</i>	377
18.2.4	<i>Relationships between the ANOVA-decomposition-based and the Derivative-based Sensitivity Measures</i>	379
18.2.5	<i>The Case of Random Input Variables</i>	380
18.2.6	<i>Moment-independent Sensitivity Measures</i>	381
18.3	Systems Reliability Subject to Uncertain Component Reliability	384
18.3.1	<i>Software Reliability</i>	386
18.4	Broad Applications	390
	References	391
19	Risk and Safety in Nuclear Power Plants	395
19.1	Introduction to Probabilistic Risk Analysis and Probabilistic Safety Assessment	395
19.2	Probabilistic (Local) Importance Measures	397
19.3	Uncertainty and Global Sensitivity Measures	399
19.4	A Case Study	399
19.5	Review of Applications	402
19.6	System Fault Diagnosis and Maintenance	404
	References	406
Afterword		409
	References	412

Appendix A	Proofs	413
A.1	Proof of Theorem 8.2.7	413
A.2	Proof of Theorem 10.2.10	414
A.3	Proof of Theorem 10.2.17	415
A.4	Proof of Theorem 10.3.11	416
A.5	Proof of Theorem 10.3.15	417
	References	418
Bibliography		419
Index		435
