Contents

List of Contributors	ix
Preface	xvii
Part I Perspectives	1
1 The Genius in History: Historiographic Explorations <i>Laura C. Ball</i>	3
2 The Psychobiography of Genius <i>William Todd Schultz</i>	20
3 Interviewing Highly Eminent Creators <i>Jeanne Nakamura and Jeff Fajans</i>	33
4 Psychometric Studies of Scientific Talent and Eminence <i>Gregory J. Feist</i>	62
5 Historiometric Studies of Genius <i>Dean Keith Simonton</i>	87
Part II Processes	107
6 The Neuroscience of Creative Genius <i>Nancy C. Andreasen and Kanchana Ramchandran</i>	109
7 Artistic Genius and Creative Cognition <i>Paul Thagard</i>	120
8 Case Studies of Genius: Ordinary Thinking, Extraordinary Outcomes <i>Robert W. Weisberg</i>	139
9 Virtual Genius <i>David Cope</i>	166

Part III Attributes	183
10 Varieties of Genius <i>Robert J. Sternberg and Stacey L. Bridges</i>	185
11 Cognitive Disinhibition, Creativity, and Psychopathology <i>Shelley H. Carson</i>	198
12 Openness to Experience <i>Robert R. McCrae and David M. Greenberg</i>	222
13 Political and Military Geniuses: Psychological Profiles and Responses to Stress <i>Peter Suedfeld</i>	244
Part IV Origins	267
14 Genetics of Intellectual and Personality Traits Associated with Creative Genius: Could Geniuses Be Cosmobian Dragon Kings? <i>Wendy Johnson and Thomas J. Bouchard, Jr.</i>	269
15 Child Prodigies and Adult Genius: A Weak Link <i>Ellen Winner</i>	297
16 Creative Genius: A View from the Expert-Performance Approach <i>K. Anders Ericsson</i>	321
17 Cognitive Processes and Development of Chess Genius: An Integrative Approach <i>Guillermo Campitelli, Fernand Gobet, and Merim Bilalić</i>	350
18 Diversifying Experiences in the Development of Genius and their Impact on Creative Cognition <i>Rodica Ioana Damian and Dean Keith Simonton</i>	375
Part V Trajectories	395
19 The Study of Mathematically Precocious Youth at Maturity: Insights into Elements of Genius <i>Harrison J. Kell and David Lubinski</i>	397
20 Age and Scientific Genius <i>Benjamin F. Jones, E.J. Reedy, and Bruce A. Weinberg</i>	422
21 Musical Creativity over the Lifespan <i>Aaron Kozbelt</i>	451
22 Literary Geniuses: Their Life, Work, and Death <i>Alexander S. McKay and James C. Kaufman</i>	473
23 Lifetime Biopsychosocial Trajectories of the Terman Gifted Children: Health, Well-Being, and Longevity <i>Katherine A. Duggan and Howard S. Friedman</i>	488

Part VI	Contexts	509
24	Evaluating Excellence in the Arts <i>Victor Ginsburgh and Sheila Weyers</i>	511
25	The Systems Model of Creativity and Its Applications <i>Mihaly Csikszentmihalyi</i>	533
26	Openness to Scientific Innovation <i>Frank J. Sulloway</i>	546
27	Prominent Modern Artists: Determinants of Creativity <i>Christiane Hellmanzik</i>	564
28	Genius in World Civilization <i>Charles Murray</i>	586
Part VII	Prospects	609
29	Does Genius Science Have a Future History? <i>Dean Keith Simonton</i>	611
	Appendix	619
	Index	629

List of Contributors

Nancy C. Andreasen MD Ph.D. is the Andrew H. Woods Chair of Psychiatry at the University of Iowa Carver College of Medicine, USA. She is a recipient of the President's National Medal of Science, awarded in part for her work on pioneering neuroimaging technologies and using them to study processes such as memory and creativity.

Laura C. Ball MA is a Ph.D. candidate in psychology at York University, Canada and is the Knowledge Translation and Implementation Coordinator at Waypoint Centre for Mental Health Care, Canada. She is interested in technologies of the self, feminist theory, historiography, and integrated knowledge translation. Her recent publications in this area include an article in *History of Psychology* titled "Genius without the 'Great Man': New Possibilities for the Historian of Psychology."

Merim Bilalić is a professor in the Department of General Psychology and Cognitive Science at Alpen Adria University Klagenfurt, Austria. He received his D.Phil. from Oxford University, UK in 2006. He is interested in cognitive and neural mechanisms in expertise, and his work on the Einstellung effect won the British Psychological Society's Award for the Outstanding Doctoral Research Contribution to Psychology in 2008. He has published on cognitive aspects of expertise in *Cognitive Psychology* and *Cognition*, on their neural implementation in *Journal of Experimental Psychology: General* and *Journal of Neuroscience*, and on individual differences in *Intelligence* and *Proceedings of the Royal Society B: Biological Sciences*.

Thomas J. Bouchard, Jr. earned his Ph.D. in psychology at the University of California, Berkeley, USA. He spent most of his career at the University of Minnesota, Minneapolis, USA, where he is professor emeritus in the Department of Psychology. His research and teaching career spans social psychology, industrial/organizational psychology, individual differences, evolutionary psychology, and behavior genetics. His current research interests are in the domains of social attitudes, personality, and values.

Stacey L. Bridges is an instructor at East Central University in Oklahoma City, USA.

Guillermo Campitelli is a senior lecturer at Edith Cowan University, Australia. He investigates individual differences in performance, judgments, and decisions with the ultimate goal of advancing knowledge to help individuals, organizations, and

societies maximize performance, improve the quality of judgments, and make rational and adaptive decisions. His recent article “Deliberate Practice: Necessary but not sufficient,” published in *Current Directions in Psychological Science*, exemplifies his extensive research in chess. expertise.

Shelley H. Carson Ph.D. is an associate of the Department of Psychology and lecturer in extension at Harvard University, USA where she conducts research and teaches courses on creativity, abnormal psychology, and resilience. Her work on creativity has been published in national and international peer-reviewed science journals and has been highlighted in national media, including the Discovery Channel, CNN, and National Public Radio. She is also author of the award-winning book *Your Creative Brain: Seven Steps to Maximize Imagination, Productivity, and Innovation in Your Life* and co-author of *Almost Depressed: Is My or My Loved One's Unhappiness a Problem?*

David Cope is currently Dickerson Professor Emeritus at the University of California at Santa Cruz, USA. He is primarily known for his work in computer composition in musical styles and is the creator of Experiments in Musical Intelligence. His own music includes nine symphonies, four operas, many symphonic poems, and chamber music of various kinds. These works have been performed extensively around the world. His books include *New Directions in Music* (7th ed.), *Techniques of the Contemporary Composer*, *Computers and Musical Style*, *Experiments in Musical Intelligence*, *The Algorithmic Composer*, *Virtual Music*, and *Computer Models of Musical Creativity*. He is also published four novels (*Death of Karlin Mulrey*, *Not by Death Alone*, *Death by Proxy*, and *Mind Over Death*), two books of short stories (*Of Blood and Tears* and *My Gun is Loaded*), and a book of 2,000 haiku called *Comes the Fiery Night*. His algorithmic art has been exhibited in several venues as well. He currently lives with his wife in Santa Cruz, California, and Santa Fe, New Mexico.

Mihaly Csikszentmihalyi was born in Fiume, Italy (now Rijeka, Croatia), to Hungarian parents. He left Italy in 1956 to study in the United States. He received a Ph.D. in human development from the University of Chicago, USA in 1965 and started teaching at a nearby college. During this time, he developed the basic model of the flow experience. In 1970 Mihaly returned to the University of Chicago, where he became chair of the Department of Psychology. In 1999 he accepted an offer to teach at the Claremont Graduate University in California, USA where he started the first doctoral program in positive psychology.

Rodica Ioana Damian earned her Ph.D. in social-personality psychology from the University of California, Davis, USA in 2013. She is currently a postdoctoral research associate at the University of Illinois at Urbana-Champaign, USA working with Dr Brent Roberts. Her research program is aimed at understanding the role of environmental antecedents on personality development and downstream consequences for achievement and creativity. In recognition of her research, Dr Damian has been awarded the Provost's Dissertation Year Fellowship and the Social Sciences Dean's Doctoral Fellowship for Excellence Award by the University of California, Davis, USA and the Frank X. Barron Award by the Society for the Psychology of Aesthetics, Creativity, and the Arts, Division 10 of the American Psychological Association.

Katherine A. Duggan is a graduate student at the University of California, Riverside, USA. She is interested in the relationships between personality, sleep, and health across

the lifespan. A Chancellor's Distinguished Fellowship Award recipient, Duggan has uncovered some of the first evidence for lifespan associations between sleep and health.

K. Anders Ericsson is Conradi Eminent Scholar at Florida State University, USA. He studies expert performance and how expert performers attain their superior performance by acquiring complex cognitive mechanisms through extended deliberate practice. He has edited the *Cambridge Handbook of Expertise and Expert Performance* and *The Development of Professional Expertise*.

Jeff Fajans MA is a doctoral student in positive organizational psychology at Claremont Graduate University, USA. His research focuses on creativity, innovation, and how mobile technologies can be leveraged as positive developmental interventions to achieve enhanced outcomes such as well-being, creative performance, and learning.

Gregory J. Feist is currently associate professor of psychology in personality at San José State University, USA and director of the MA program in research and experimental psychology. He has also taught at the College of William & Mary and the University of California at Davis. He received his Ph.D. in 1991 from the University of California at Berkeley and his undergraduate degree in 1985 from the University of Massachusetts-Amherst. He is widely published in the psychology of creativity, the psychology of science, and the development of scientific talent. One major focus of his work is establishing the psychology of science as a healthy and independent study of science, along the lines of the history, philosophy, and sociology of science. His major efforts toward this end are publishing a book entitled *Psychology of Science and the Origins of the Scientific Mind*, which was awarded the 2007 William James Book Prize by the Division of General Psychology, American Psychological Association (APA); being the founding president of the newly formed "International Society for the Psychology of Science and Technology"; and being the founding editor-in-chief of a new peer-reviewed journal, *Journal of Psychology of Science & Technology*.

Howard S. Friedman is distinguished professor of psychology at the University of California, Riverside, USA. He has received the James McKeen Cattell Fellow Award from the Association for Psychological Science, a career award for applied research. His latest book is *The Longevity Project: Surprising Discoveries for Health and Long Life from the Landmark Eight-Decade Study*, which summarizes his 20-year scientific study of the pathways to health and long life. This book won first place in the Wellness category in the Books for A Better Life awards competition. Friedman has also received many teaching awards, including most recently the national Elizabeth Hurlock Beckman Award, for "inspiring students to make a difference in the community." <http://www.psych.ucr.edu/faculty/friedman/index.html>

Victor Ginsburgh, is honorary professor of economics at ECARES, Université libre de Bruxelles, Belgium and is also affiliated to CORE, Université catholique de Louvain, Louvain-la-Neuve, Belgium. He has written and edited many books and is the author of over 180 papers in applied and theoretical economics, including industrial organization and general equilibrium analysis. His recent work includes economics of the arts, wines, and languages; he has published over 70 papers on these topics, some of which appeared in *American Economic Review*, *Journal of Political Economy*, *Games and Economic Behavior*, *Journal of Economic Perspectives*, *Economic Journal*, *Journal of the European Economic Association*, *Empirical Studies of the Arts*, and the *Journal of*

Cultural Economics. He is coeditor (with David Throsby) of the two volumes of the *Handbook of the Economics of Art and Culture*.

Fernand Gobet is professor of cognitive psychology at the University of Liverpool, UK. His main research interest is the psychology of expertise and talent, which he has studied in numerous domains including board games, physics, computer programming, music, sport, business, language acquisition, nursing, and physiotherapy. His research combines experimental methods with computational modelling. He has coauthored six books, including *Psychologie du Talent et de l'Expertise* and *Foundations of Cognitive Psychology*.

David M. Greenberg is a Ph.D. candidate at the University of Cambridge, UK where he researches individual differences in musical engagement, including the emotional, cognitive, and social implications of strong musical experiences.

Christiane Hellmanzik is assistant professor of economics at the University of Hamburg, Germany. Her research focuses on applied microeconomics, in particular agglomeration, peer effects, “superstars,” and migration. She holds a BSc in economics from the University of Maastricht, an MA in economics from University College Dublin, and a Ph.D. in economics from Trinity College Dublin, Ireland.

Wendy Johnson graduated in mathematics from Occidental College in Los Angeles, USA. She spent many years as a consulting casualty actuary in the San Francisco Bay Area before entering the doctoral program in psychology at the University of Minnesota, USA, completing her degree in 2005. Her research focuses on individual differences in mental abilities, personality, academic achievement, and later-life health, emphasizing transactions between genetic and environmental influences. She is currently in the Department of Psychology and Centre for Cognitive Ageing and Cognitive Epidemiology at the University of Edinburgh, UK.

Benjamin F. Jones is an associate professor at the Kellogg School of Management, Northwestern University, USA, where he also directs the Kellogg Innovation and Entrepreneurship Initiative, and is a research associate of the National Bureau of Economic Research. His research focuses largely on innovation and creativity, with recent work investigating the role of teamwork in innovation and the relationship between age and invention. He also studies global economic development, including the roles of education, climate, and national leadership in explaining the wealth and poverty of nations. His research has appeared in journals such as *Science*, the *Proceedings of the National Academy of Sciences*, and the *Quarterly Journal of Economics* and has been profiled in media outlets such as the *Wall Street Journal*, the *Economist*, and *The New Yorker*.

James C. Kaufman is a professor of educational psychology at the University of Connecticut, USA. He is the author or editor of 25 books either published or in press, including *Creativity 101* and is the editor of the APA journal *Psychology of Popular Media Culture* and the current president of APA's Division 10 (Psychology of Aesthetics, Creativity, and the Arts).

Harrison J. Kell is a postdoctoral fellow at the Study of Mathematically Precocious Youth at Vanderbilt University, USA. He received his Ph.D. in psychology from Rice

University, USA in 2011. He is interested in how individual differences predict human performance, broadly construed, and how basic knowledge about human psychological diversity can be better utilized in the developmental sciences, in applied settings, and for developing policy. His research interests in human potential are illustrated in two recent articles in *Psychological Science*: “Who Rises to the Top? Early Indicators” and “Creativity and Technical Innovation: Spatial Ability’s Unique Role.” The former underscores the importance of assessing the full range of human potential for understanding creativity and the latter highlights neglected talent currently being missed.

Aaron Kozbelt is professor of psychology at Brooklyn College, USA and The Graduate Center of the City University of New York, USA. His research foci lie at the intersection of creativity and cognition in the arts, particularly on the nature of the creative process in visual art, archival analyses of lifespan creativity trajectories and self-evaluation in classical composers, and the psychological basis of skilled artistic drawing. He is the author of over 60 journal articles and book chapters on these and other topics and serves on several editorial boards. He has been the recipient of the American Psychological Association Division 10 Daniel Berlyne Award for Creativity Research and the International Association of Empirical Aesthetics Alexander Gottlieb Baumgarten Award for Creativity Research and his research has been funded by the National Science Foundation.

David Lubinski is professor of psychology at Vanderbilt University, USA and co-director of the Study of Mathematically Precocious Youth, a planned 50-year longitudinal study of over 5,000 intellectually talented participants begun in 1971. His research interests are in modeling the development of exceptional intellectual talent over the life span (with cognitive, affective, and conative assessments) and uncovering factors that enhance and attenuate for this population learning and work accomplishments as well as creativity. He is president of the International Society for Intelligence Research (2013) and a trustee for the Society for Multivariate Experimental Psychology, and he has served as associate editor for the *Journal of Personality and Social Psychology*. In 1996, he received the APA’s Early Career Award (psychometrics/applied individual differences) and the George A. Millar Outstanding Article in General Psychology Award; in 2006, he received the Distinguished Scholar Award from the National Association for Gifted Children.

Robert R. McCrae is retired from the National Institute on Aging, where he conducted research on personality structure, development, and assessment. He is coauthor (with Paul T. Costa, Jr.) of *Personality in Adulthood: A Five-Factor Theory Perspective*. He lives in Baltimore, Maryland, USA.

Alexander S. McKay is a graduate student in experimental psychology at California State University at San Bernardino, USA. His research interests include creativity, personality, and ethics.

Charles Murray is the W.H. Brady Scholar at the American Enterprise Institute for Public Policy Research, USA. His books include *Losing Ground*, *The Bell Curve* (with Richard J. Herrnstein), *Human Accomplishment*, and *Coming Apart*.

Jeanne Nakamura is associate professor of psychology, Claremont Graduate University, USA, where she codirects the positive psychology program and the Quality of Life
