About the Authors

Mike Alexander is a Microsoft Certified Application Developer (MCAD) and author of several books on advanced business analysis with Microsoft Access and Excel. He has more than 16 years' experience consulting and developing Office solutions. Mike has been named a Microsoft MVP for his ongoing contributions to the Excel community. You can visit Mike at www.datapigtechnologies.com, where he regularly shares Excel and Access tips and techniques.

Jared Decker has over fourteen years of experience in the IT industry and ten years of consulting experience focused exclusively on data warehousing and business intelligence. In addition to playing an architect or lead role on dozens of projects, he has spent more than five hundred hours in-house with corporations training their development teams on the Microsoft SQL Server, Tableau, and QlikView BI platforms. His breadth of experience entails everything from architecture and design to system implementation, with particular focus on business analytics and data visualization. Jared holds technical certifications in Microsoft (MCITP Business Intelligence Developer and certified trainer), Tableau Developer, and QlikView Developer and Trainer.

Bernard Wehbe has over 14 years of consulting experience focused exclusively on data warehousing, analytics, and business intelligence. His experience includes data warehousing architecture, OLAP, data modeling, ETL, reporting, business analysis, team leadership, and project management. Prior to founding StatSlice Systems, Bernard served as a technical architect for Hitachi Consulting in the Dallas, TX area.

Contents at a Glance

Introduction	1
--------------------	---

Part I: Leveraging Excel for Business Intelligence

Chapter 1: Important Database Concepts	7
Chapter 2: PivotTable Fundamentals.....	19
Chapter 3: Introduction to Power Pivot	47
Chapter 4: Loading External Data into Power Pivot	69
Chapter 5: Creating Dashboards with Power View.....	93
Chapter 6: Adding Location Intelligence with Power Map	107
Chapter 7: Using the Power Query Add-In.....	129

Part II: Leveraging SQL for Business Intelligence

Chapter 8: Essential SQL Server Concepts	157
Chapter 9: Introduction to SQL	181
Chapter 10: Creating and Managing SQL Scripts.....	195
Chapter 11: Calling Views and Stored Procedures from Excel	215
Chapter 12: Understanding Reporting Services.....	231
Chapter 13: Browsing Analysis Services OLAP Cubes with Excel.....	249
Chapter 14: Using the Data Mining Add-In for Microsoft Office.....	269

Part III: Delivering Business Intelligence with SharePoint and Excel Services

Chapter 15: Publishing Your BI Tools to SharePoint	293
Chapter 16: Leveraging PerformancePoint Services	307

Part IV: Appendixes

Appendix A: Understanding the Big Data Toolset	331
Appendix B: Considerations for Delivering Mobile BI	341

Table of Contents

Introduction	1
--------------------	---

Part I: Leveraging Excel for Business Intelligence

Chapter 1: Important Database Concepts	7
Traditional Limits of Excel and How Databases Help.....	8
Scalability	8
Transparency of analytical processes	9
Separation of data and presentation	9
Database Terminology.....	10
Databases.....	10
Tables.....	11
Records, fields, and values	11
Queries	12
How Databases Are Designed	12
Step 1: The overall design — from concept to reality.....	12
Step 2: Report design.....	13
Step 3: Data design	13
Step 4: Table design	15
Chapter 2: PivotTable Fundamentals	19
Introducing the PivotTable.....	19
Anatomy of a PivotTable.....	20
Creating the basic PivotTable	21
Customizing Your PivotTable.....	27
Changing the PivotTable layout.....	27
Renaming the fields	27
Formatting numbers	29
Changing summary calculations	29
Suppressing subtotals	30
Hiding and showing data items	31
Hiding or showing items without data	33
Sorting your PivotTable.....	35
Understanding Slicers.....	35
Creating a standard slicer.....	36
Formatting slicers	37
Controlling multiple PivotTables with one slicer	39
Creating a Timeline Slicer	40
Understanding the Internal Data Model	42
Building out your first Data Model	42
Using your Data Model in a PivotTable	45

Chapter 3: Introduction to Power Pivot	47
Understanding the Power Pivot Internal Data Model.....	48
Linking Excel Tables to Power Pivot	49
Preparing your Excel tables	50
Adding your Excel tables to the Data Model.....	51
Creating Relationships Among Your Power Pivot Tables.....	53
Creating a PivotTable from Power Pivot Data	56
Enhancing Power Pivot Data with Calculated Columns.....	57
Creating a calculated column	58
Formatting your calculated columns	60
Referencing calculated columns in other calculations.....	60
Hiding calculated columns from end users	60
Utilizing DAX to Create Calculated Columns	61
Identifying DAX functions that are safe for calculated columns.....	61
Building DAX-driven calculated columns.....	63
Understanding Calculated Fields	65
Chapter 4: Loading External Data into Power Pivot.....	69
Loading Data from Relational Databases.....	69
Loading data from SQL Server	70
Loading data from Microsoft Access databases	76
Loading data from other relational database systems.....	78
Loading Data from Flat Files.....	81
Loading data from external Excel files	82
Loading data from text files.....	84
Loading data from the clipboard.....	86
Loading Data from Other Data Sources	88
Refreshing and Managing External Data Connections	89
Manually refreshing your Power Pivot data.....	89
Setting up automatic refreshing	89
Preventing Refresh All	90
Editing your data connection	91
Chapter 5: Creating Dashboards with Power View.....	93
Activating the Power View Add-In.....	93
Creating a Power View Dashboard.....	94
Creating and working with Power View charts.....	96
Visualizing data in a Power View map	101
Changing the look of your Power View dashboard.....	104
Chapter 6: Adding Location Intelligence with Power Map.....	107
Installing and Activating the Power Map Add-In	108
Loading Data into Power Map.....	108
Choosing geography and map level.....	110
Handling geocoding alerts.....	111
Navigating the map	113

Managing and Modifying Map Visualizations	114
Visualization types	116
Adding categories.....	119
Visualizing data over time	119
Adding layers	121
Adding Custom Components	122
Adding a top/bottom chart	123
Adding annotations and text boxes.....	124
Adding legends	125
Customizing map themes and labels.....	125
Customizing and Managing Power Map Tours	125
Understanding scenes.....	126
Configuring scenes.....	126
Playing and sharing a tour	128
Sharing screenshots	128
Chapter 7: Using the Power Query Add-In	129
Installing and Activating the Power Query Add-In.....	130
Downloading the Power Query Add-In.....	130
Power Query Basics	131
Searching for source data.....	131
Shaping the selected source data	132
Understanding query steps	135
Outputting your query results	137
Refreshing Power Query data	138
Managing existing queries.....	139
Understanding Column and Table Actions.....	140
Column level actions	140
Table actions	142
Power Query Connection Types	143
Creating and Using Power Query Functions.....	145
Creating and using a basic custom function	146
Advanced function example: Combining all Excel files in a directory into one table	149

Part II: Leveraging SQL for Business Intelligence

Chapter 8: Essential SQL Server Concepts.....	157
SQL Server Components	157
SQL Server Relational Database Engine.....	158
SQL Server Management Studio	158
Connecting to a Database Service	160
SQL Server Security	160
Server access.....	160
Database access.....	162
Database object access	165

Working with Databases	167
Creating a database	168
Database maintenance	169
Working with Tables and Views	171
Creating a table	172
Creating a view	174
Data Importing and Exporting	177
Chapter 9: Introduction to SQL.....	181
SQL Basics	181
The Select statement	181
The From clause.....	182
Joins basics	182
The Where clause.....	183
Grouping	184
The Order By clause	184
Selecting Distinct records.....	185
Selecting Top records	186
Advanced SQL Concepts	187
The Union operator.....	187
Case expression	187
Like operator.....	188
Subqueries.....	189
Advanced joins.....	190
Advanced grouping	191
Manipulating data.....	192
Chapter 10: Creating and Managing SQL Scripts	195
Design Concepts.....	195
Stay organized	196
Move data in one direction	197
Divide data according to metrics and attributes	197
Consider data volumes up front.....	198
Consider full data reload requirements.....	199
Set up logging and data validation.....	200
Working with SQL Scripts	200
Data extraction scripting	201
Data preparation scripting	204
Data delivery scripting.....	205
Error handling.....	206
Creating and altering stored procedures	207
Indexing and Performance Considerations.....	208
Understanding index types	208
Creating an index	209
Dropping an index	210
Additional tips and tricks	211

SQL Solutions to Common Analytics Problems.....	211
Creating an Active Members Report.....	211
Creating a Cumulative Amount Report.....	213
Creating a Top Performers Report.....	213
Creating an Exception List Report	214
Chapter 11: Calling Views and Stored Procedures from Excel	215
Importing Data from SQL Server.....	215
Passing Your Own SQL Statements to External Databases.....	219
Manually editing SQL statements	220
Running stored procedures from Excel.....	221
Using VBA to create dynamic connections.....	222
Creating a Data Model with Multiple SQL Data Objects.....	224
Calling Stored Procedures Directly from Power Pivot.....	227
Chapter 12: Understanding Reporting Services	231
Reporting Services Overview	231
Developing a Reporting Services Report.....	233
Defining a shared data source	239
Defining a shared dataset.....	240
Deploying Reports.....	242
The deployment process	242
Accessing reports	243
SSRS security.....	244
Managing Subscriptions	245
Chapter 13: Browsing Analysis Services OLAP Cubes with Excel.....	249
What Is an OLAP Database and What Can It Do?	250
Understanding OLAP Cubes.....	251
Understanding dimensions and measures.....	251
Understanding hierarchies and dimension parts.....	251
Connecting to an OLAP Data Source.....	252
Understanding the Limitations of OLAP PivotTables	256
Creating Offline Cubes.....	256
Using Cube Functions.....	259
Adding Calculations to Your OLAP PivotTables.....	260
Creating calculated measures.....	261
Creating calculated members.....	264
Managing your OLAP calculations.....	266
Performing what-if analysis with OLAP data	266
Chapter 14: Using the Data Mining Add-In for Microsoft Office.....	269
Installing and Activating the Data Mining Add-In	269
Downloading the Data Mining Add-In.....	269
Pointing to an Analysis Services database	270
Analyze Key Influencers.....	272
Detect Categories.....	274
