INTRODUCTION 2

| | |
|--|---|
| About Minecraft and LearnToMod | 2 |
| About This Book | 2 |
| About You. | 3 |
| About the Icons | 4 |

PROJECT 1: START MODDING 5

| | |
|---|----|
| Know What Minecraft Modding Is | 5 |
| Use the LearnToMod Online Software | 6 |
| Sign up for LearnToMod | 7 |
| Use the LearnToMod badges. | 8 |
| Connect your mods to Minecraft. | 8 |
| Connect to the LearnToMod Server | 12 |
| Check Out the Coding Environment | 13 |
| Test Your Mod | 15 |
| Run Your Mod in Minecraft. | 19 |
| Get Ready to Write Your Own Minecraft Mods. | 22 |
| Share a Mod with Friends | 24 |
| How Your Friend Finds Your Mod | 25 |
| Earn Modding Badges | 27 |
| Earn Scramble badges. | 27 |
| Earn the Saying Hello badge: Scramble Edition | 29 |
| Communicate with your computer. | 30 |
| Earn Missing badges. | 31 |
| Trace code | 32 |
| Earn the Saying Hello badge: Missing Edition | 33 |

PROJECT 2: SPLEEF

36

| | |
|---|----|
| Introduce the Gameplay Loop | 37 |
| Start: Create a basic scene | 38 |
| Goal: Add a way to win and lose | 38 |
| Challenge: Make it harder to win | 39 |
| Reward: Make players want to win | 39 |
| Plan and Try Test Cases. | 40 |
| Debug Your Code | 41 |
| Make Spleef: Iteration 1 | 42 |
| Explore the ArenaBuilder library | 42 |
| Start: Import the ArenaBuilder library | 44 |
| Goal: Make a way to win and lose. | 48 |
| Challenge: Make blocks disappear one second after touching them | 55 |
| Reward: Give the player points | 59 |
| Make Spleef: Iteration 2 | 62 |
| Start: Add a lava platform | 63 |
| Goal: Destroy at least 200 blocks | 63 |
| Challenge: Add an enemy | 64 |
| Reward: Add fireworks. | 64 |

PROJECT 3: MONSTER ARENA

67

| | |
|---|----|
| Draw the Gameplay Loop | 67 |
| Iteration 1: Make Monster Arena | 68 |
| Start: Create a basic arena with a fence | 70 |
| Refactor: Move the arena code to a new function | 76 |
| Goal: Add a melon block to break | 76 |
| Test: Make sure your game works | 78 |
| Challenge: Add monsters to the arena | 78 |
| Reward: Replay the first level. | 80 |
| Test: Iteration 1 completed. | 84 |
| Iteration 2: Add Levels | 85 |
| Start: Make the arena unique. | 86 |
| Goal: Wait until a later iteration. | 87 |
| Challenge: Add monsters | 87 |

| | |
|---|-----------|
| Reward: Add a second level | 87 |
| Test: Make sure both levels work | 90 |
| Iteration 3: Add Levels to Your Levels | 90 |
| Challenge: Switch to Survival mode | 91 |
| Reward: Add five more levels. | 93 |
| Make More Iterations: Be Creative and Unique | 95 |

PROJECT 4: CAPTURE THE FLAG **97**

| | |
|---|-----|
| Use the Capture the Flag Library | 97 |
| Make a Basic Capture the Flag | 99 |
| Test Your Two-Player Capture the Flag | 102 |
| Add Wands | 104 |
| Attach Magic to Your Wands | 106 |
| Make Your Own Wand | 111 |
| Give Each Player Two Wands | 115 |

INTRODUCTION

SO YOU WANT TO MOD MINECRAFT – THAT’S A GREAT IDEA!

You’re about to be transformed from a Minecraft *player* into a Minecraft *modder*. To get there, you have to code. You can handle it, because you’ll use skills you already have — logic, creativity, math, gaming, and problem solving — to design, build, test, and share Minecraft mods. This book tells you everything, from building a large arena to making a multiplayer game that you can play *inside* Minecraft with your friends.

ABOUT MINECRAFT AND LEARNTOMOD

Minecraft modding used to be only for expert coders. Not anymore. LearnToMod helps students just like you through the challenges of Minecraft modding. It explains coding ideas and shows how much fun it can be to start making mods. LearnToMod has over 200 badges that guide you, but you can make your own mods.

The LearnToMod online software teaches you how to make modifications, or *mods*, that you can run in the multiplayer version of Minecraft on your very own Minecraft server.

Get LearnToMod at mod.learntomod.com. With this book, you get free access to LearnToMod for 60 days. Go to www.dummies.com/go/moddingminecraft for the trial information.

ABOUT THIS BOOK

Modding Minecraft has projects that help you design, build, and test each mod, from start to finish. You can play these minigames *inside* Minecraft. The earlier mods are simpler, so you might want to try the projects in order.

How are you going to see what code to enter if I'm not there with you? I'll show instructions and code examples — actual pictures of my screen.

Code is in `monofont`. If you're reading this as an ebook, you can tap web addresses to visit websites, like this: www.dummies.com.

Some figures will have a magnifying glass, like you see here. The glass is drawing attention to the parts of the screen that you use. The **highlighted text** draws your attention to the figure.

Working with LearnToMod is super simple: I just give you steps like “Drag a function into the programming environment” or “Click the Minecraft category and then Players.” Or I may tell you to click a link or a tab.

ABOUT YOU

Everybody has to start somewhere, right? I had to start writing this book by assuming that you're comfortable doing this stuff:

- » **Typing on a computer and using a mouse.** You may know how to use a Windows system or a Mac; either one will do. All coding takes place in a web browser — and on any browser on either platform. This book shows LearnToMod on a Mac using the Chrome browser.
- » **Getting around on a website.** You can click a link or find a website easy peasy.

- » **Playing Minecraft.** You don't need to be a Minecraft expert and you don't have to know how to code. You can play on Windows or a Macintosh, but you have to use the desktop version. The Pocket Edition, which is played on mobile devices, doesn't work with LearnToMod.
- » **Doing basic math.** That includes adding whole numbers (like $2+2$), and logical operations (like knowing that 3 is more than 2).

ABOUT THE ICONS

As you read through the projects in this book, you'll see a few icons. The icons point out different things:

Watch out! This icon comes with important information that may save you from trouble that modders sometimes have.

The Remember icon comes with ideas that you should keep in mind.

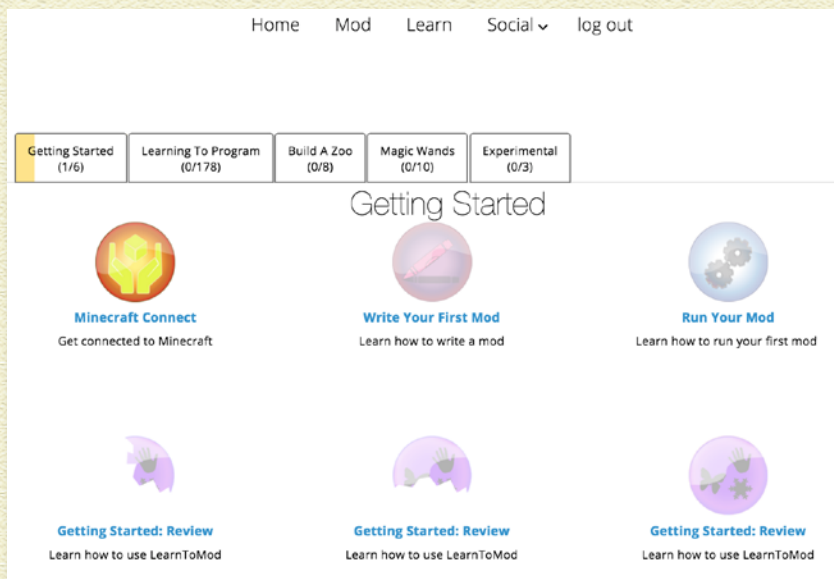

The Tip icon marks advice and shortcuts that can make modding easier.

The Fun with Code icon describes how the modding you're doing relates to the bigger picture of coding.

PROJECT 1 *START MODDING*

IN THIS PROJECT, I EXPLAIN HOW TO USE THE LEARNTOMOD ONLINE SOFTWARE. I also explain how to connect to the LearnToMod multiplayer Minecraft Server, and show you how to use the basic tools, such as invisible robots, that you need in order to make your own, fun-filled mods.

KNOW WHAT MINECRAFT MODDING IS

Video games are made up of code. Thousands of lines of code. Code that lets players — players like you — explore new worlds and interact with characters.

Some games, like Minecraft, let players add their own code to create new worlds, challenges, or characters.

6 PROJECT 1 *START MODDING*

Mods, which is short for modifications (or changes), can be almost any task. A task is something you do, like create a tower or make a mountain explode with TNT.

You can make these tasks by using mods:

- » **Texture:** Change the way the world looks by loading a new texture pack.
- » **Block interaction:** Cause an explosion whenever the player destroys a wood block type.
- » **New block:** Create new blocks, like an `ultra-TNT` block that makes a bigger explosion.
- » **Minigame:** Create a minigame within a world. The projects in this book help you do that.
- » **Large structure:** Create huge structures (that would take a long time to make by hand but take no time with code).

USE THE LEARNTOMOD ONLINE SOFTWARE

The LearnToMod online software walks you through coding challenges. When you complete a challenge, you earn a badge. Check out the next sections to get started with LearnToMod.

Get the LearnToMod online software at mod.learntomod.com.

This is the software that you'll use for the projects in this book. The badges will lead you through learning coding and different ways to make neat mods.

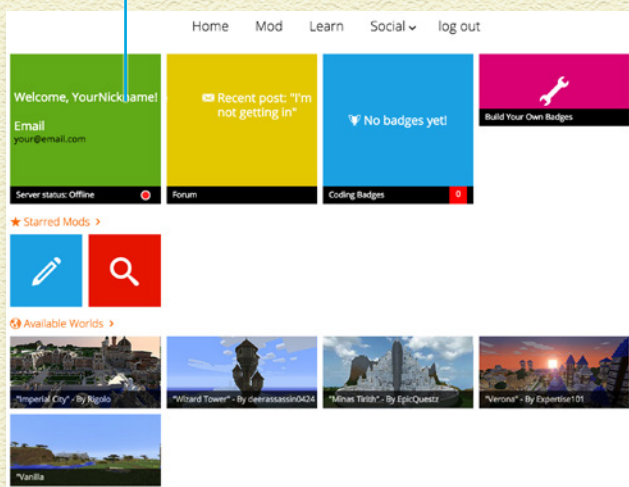

SIGN UP FOR LEARNTOMOD

It takes about five minutes to sign up for LearnToMod. To sign up for the software, follow these steps:

- 1 In a web browser, go to mod.learntomod.com.
- 2 Fill out the **Sign Up form**.
Another dialog box opens.
- 3 In the top of the dialog box, type the access key that you got in this book.
- 4 Make a nickname.
- 5 The **dashboard** (also known as the **home screen**) opens.

Here's my clever nickname

People will see your nickname anytime you share your mods, so don't use your real name.
